The Boy Copper Miner

—OR—

TED BROWN'S RISE TO RICHES

By A SELF-MADE MAN.

CHAPTER I.

THE BULLY OF THE MINE.

"Gee! But I'm glad work is over for the day. I'm about fagged out."

Thus spoke Ted Brown, a sturdy, good-looking boy, with a deeply tanned countenance, as a shrill whistle resounded through the narrow, rugged tunnel, deep down in the ground, where a group of copper miners, each with a small lamp in the front of his hat and a pickaxe or shovel in his hand, were following up the operations of a power drill that was boring a way further and further from the perpendicular main shaft which led up two hundred feet or more to the surface of the earth.

Ted had been working in the Lookout copper mine near Carson, Montana, for about three months, and in that short time he had learned what it was to hustle for a living.

He had been born and brought up on a small farm in Petersville, Iowa, and knew what it was to labor by the sweat of his brow during the busy season; but hard as he had found farm work, it was to a certain extent child's play beside copper mining in the dark and noisome regions under ground.

He had come West four months before to look up a piece of property in the vicinity of Carson which had been left him by his late uncle, Hiram Brown.

As he was under age, his mother held it in trust for him.

Soon after the property had come to him, Ted read in the papers about the new discoveries of copper ore in Montana.

Learning that there were copper mines in operation in the neighborhood of his property, he began to figure that there might be copper on his ground as well.

If there was, he felt that he was in line to become a rich boy.

The more he thought the matter over the more eager he became to investigate the question for himself.

Not without difficulty he persuaded his mother to let him go West in order to satisfy his curiosity.

He brought a copy of the deed and the official survey of his property with him, and after reaching Carson he found no trouble in locating his land, which had been duly recorded in his name a short time before.

He spent a couple of weeks making inquiries among the denizens of the wild and woolly district around Carson, but nobody could throw any light on the character of his ground beneath the surface.

So far as its upper crust went, he could see that for himself.

In extent it measured several acres, was more or less uneven, having a decided elevation at one point, and was sparsely wooded.

A deep creek, that some people would have called a small river, formed its eastern boundary, and ran southward for a mile, when it emptied into one of Montana's numerous big streams.

Ted found that the ground would have to be thoroughly prospected by an expert before any reliable opinion could be passed on the copper question.

This would cost money, and Ted had no money to spend on such an investigation.

Having reached the end of his tether, most boys would have turned around and gone back home.

Ted, however, was different from most boys.

He was a lad of grit and determination.

Having got the idea into his crop that there was copper on his property, he determined to remain West and push the matter to a finish.

Not being overburdened with cash, it was necessary for him to get a job in order for him to pay his way.

He had the choice between going into a store in Carson or tackling copper mining.

He chose the latter because, though the work was infinitely harder, he would gain a whole lot of practical experience in a line he was deeply interested in.

So he applied for work at the Lookout mine and was employed.

After making the remark with which this chapter opens, Ted slung his shovel over his shoulder and turned his dirt-begrimed face toward the main shaft, where a stout wooden cage attached to a wire cable was waiting to carry the day shift in sections to the surface above.

"Hello, Ted; glad you're alive?" asked a boy of about his own age who had been working in the same tunnel, and was waiting to accompany him to the main shaft.

"That's about all I am, Jesse," replied Ted, as they started along together.

Ted and Jesse Dane had become sworn friends since the first few days of the former's employment in the mine.

Jesse was an orphan, the son of a miner who had lost his life in the Lookout mine a year since.

He had worked long enough underground to be quite experienced at the business, and his advice and assistance proved of great value to Ted during his first weeks on the job.

"Tired, eh?" grinned Jesse.

"I should say I am! It's been a hard day."

"I don't see that there's much difference between one day and another. They're all hard enough. The copper we dig out by the sweat of our brows makes some fortunate people richer even while they're living on the fat of the land and enjoying themselves. Sunday is the only time we have for rest and recreation, and there isn't a whole lot of pleasure to be found in this neighborhood."

"That's right, there isn't. Well, maybe some day I'll be rich myself."

"You're always thinking about that land of yours."

"Why not? You agree with me that there may be copper in the ground. The whole region around here is said to be more or less affected by the veins of ore."

"I've advised you to talk with the superintendent on the subject. He might interest the owners of this mine so far that they might be induced to have your ground prospected. If it showed outcroppings of the ore, they'd buy it from you at a good price."

"Of course they'd buy it if they had some evidence of the presence of copper ore on it; but they wouldn't give anything near what it was worth in that case. It might prove to be a valuable copper mine, worth a million or more, but I'd come in for a mighty small share of its real value. These copper barons are out for everything in sight, and as they have the coin behind them they have a bulge on the situation."

"That isn't any lie, I'll admit," replied Jesse, as they walked up to a crowd of men awaiting their turn to be lifted up the shaft.

The cage came down and a rush was made to get into it.

Jesse sprang in and Ted was following, and had put one leg over the side, when a big, surly-looking miner named Tug Ralston grabbed him by the shoulder, pulled him forcibly back, and coolly took his place.

Those in the cage regarded this wanton act with evident disapproval.

It was might against right, and not according to their code of honor.

"What did you do that for, Tug Ralston?" demanded Ted indignantly.

"Because it suited me," grunted the stalwart miner.

"You wouldn't do it to one of your size, you big bully!" cried Ted, who was hot under the collar over the act.

"Don't you give me none of your sass, young feller, or I'll wring your neck," answered Ralston menacingly.

"You won't wring my neck—not if I know it," replied Ted pluckily.

"Won't I?" snarled the man.

He hauled back and deliberately struck Ted in the face with the palm of his horny hand.

Ted staggered back from the force of the blow, then as the signal was given to hoist away, he rushed forward and smashed Ralston a blow in the eye with the full force of his fist, and Ted's fist was not a soft one, either.

The man uttered an imprecation and made a spring to reach the boy.

Ted eluded his grasp, though he reached far over the side of the cage.

At that moment the cage started with a jerk. Ralston lost his balance and fell out head first, taking a drop of a dozen feet.

The ground was much harder than his cranium, and so the shock deprived him of consciousness.

Neither Ted nor the men who were yet to go up felt much sympathy for the bully.

He was not generally liked, except possibly by two or three cronies who associated with him, and who found it to their interest to stand in with him.

The incident was regarded as rather serious by the men, who knew the implacable side of the ruffian's character.

"I'm afraid you've put your foot in it, my lad," said a brawny miner. "You'll find that you've made an enemy of Ralston, and he's a bad man to be up against."

"I don't care," replied Ted. "I won't let him or anybody else sit on my neck."

"You're a plucky chap," said the miner, favoring Ted with an admiring look. "We all agree that Ralston had no right to pull you out of the cage, but that won't mend matters. Tug is accustomed to do pretty much as he pleases, for nobody cares to quarrel with him. He's known to be quarrelsome and vindictive when opposed. Let me advise you to steer clear of him, and at the same time to be on your guard. He'd just as soon strike you behind your back as not, even if you're only a boy. If the matter is reported to the superintendent, I wouldn't be surprised if Ralston was discharged. I've heard that the super has only been waiting for an excuse to get rid of him ever since he sent one of the men to the doctor with a fractured skull from a blow with his shovel. He claimed it was an accident, but there are reasons for believing it was done deliberately. However, as the man died and the case couldn't be proved against him,

nothing was done; but he's regarded as an eyesore at the mine."

No one tried to bring Ralston to his senses.

He was propped up against one of the tunnel walls and allowed to remain there till the cage came down again, when he was lifted into it.

"Get in, my lad," said the miner.

Ted got in, the rest followed, and they were soon brought up to the mouth of the shaft.

CHAPTER II.

A RUN IN WITH TUG RALSTON ON THE STREET.

Jesse Dane was waiting near the mouth of the shaft for Ted to come up.

He and Ted roomed together in the same house on the suburb of Carson about half a mile from the mine.

A dozen of the single men boarded there also.

The place was called the "Miners' Rest," and the front room on the ground floor was fitted up as a saloon.

The dining-room was just behind, with the kitchen in the rear.

The rudely furnished sleeping-rooms were on the two floors above.

"Is he dead?" asked Jesse, observing the ghastly look on Tug Ralston's face as the fellow was lifted from the cage and borne to one of the sheds close by.

"No such luck," growled one of the miners, who privately detested the bully. "The roof of the mine would have to fall on him to give him his quietus."

"You had a great nerve to hit him the way you did," said Jesse to Ted. "He'll be down on you after this like a thousand of brick."

"I can't help that," replied Ted. "He struck me a cowardly blow, and I gave him back as good."

"He'll get square with you some day, I'm afraid," said Jesse, shaking his head.

"I'll watch out that he doesn't."

"You'll have to keep your eyes skinned all the time."

"I mean to. I know what he is."

"He killed a man in the mine seven months ago."

"So I heard. Fractured his skull with his shovel."

"He said it was done by accident, but the men think differently."

"He ought to have been discharged on general principles, for he carries things with a pretty high hand."

"I guess the super doesn't care to have a run-in with him."

"The men seem a bit afraid of him."

"They are. They don't care to make an enemy of him."

"I suppose I have."

"There isn't much doubt about that."

"He's the biggest man in the mine. Only a coward and a cur of his size would try to get back at a boy like me."

"That's what he is."

"If he tackles me I'll do my best to defend myself."

"You won't stand much chance if he goes for you."

"I wish I had a gun. I'd be justified in using it against him."

"If I were you, I'd buy a small revolver in Carson to-night. If he attacked you and you shot him nothing would be done to you."

"I'd be put in jail and would have to prove that I did it in self-defense."

"I guess you could prove that easily enough. His size and reputation would be in your favor."

"I don't like the idea of being obliged to shoot, even such a brute as Tug Ralston."

"Better that than be killed yourself."

"Would he dare go as far as that? It would go pretty hard with him, I think, if he did me up."

"I guess it would, but that wouldn't do you any good. It's best to be on the safe side."

"I don't intend to let the matter worry me, at any rate. He doesn't work in our tunnel, so I don't think he'll be able to take any advantage of me below. The men wouldn't let him attack me openly."

"He'll lay for you above ground."

"I won't let him get near me if I can help it."

"I'll stand by you. We'll go about together as we usually do, anyway. He'll have to tackle both of us if he wants to reach you."

"Thanks, Jesse. I know you'll do what you can for me."

"Bet your life I will."

They had now reached their boarding-house, so they hurried in to wash up and then go to supper.

The long table was crowded, but their places were waiting for them.

Two rosy-cheeked young women acted as waitresses.

Ted was a favorite with both of them, but Maggie Moss, the smaller of the two, regarded him as her especial property, for she always waited on the boys.

"Hello, Maggie; how's things?" said Ted, as he took his seat.

"Lovely," she replied, with a smile.

"So are you," grinned Ted.

"No compliments, please. There's oxtail and vegetable soup to-night—which will you have?"

"Give me the oxtail."

Jesse said he'd have the same, and the girl presently brought two platesful.

"Roast beef, or boiled mutton with capers?" asked the girl.

"Mutton for me," answered Ted, and again Jesse said the same for him.

Coffee followed, and the meal wound up with rice pudding full of raisins.

The boys ate heartily and left the table feeling good.

They got their hats and took a stroll into Carson.

There were a couple of dance halls in the town, and a vaudeville show which commenced at eight o'clock.

Of plain saloons there were aplenty, and all were well patronized after dark.

There was a Methodist church and a Catholic school.

An entertainment, a quarter admission, had been announced to take place that evening in the basement of the former.

It consisted of moving pictures descriptive of Oriental lands, interspersed with music furnished by a phonograph.

Ted and Jesse decided to take it in.

The show proved to be well worth the money, and the boys enjoyed it very much indeed.

It was over at ten o'clock.

When they came out of the church and walked back toward their boarding-house they found the saloons on their way in full blast.

As they passed one of them Tug Ralston, with his head bound up, came out with two of his cronies.

He was pretty well loaded, but not so drunk but he recognized Ted.

With a howl of concentrated rage, he made a spring for the boy.

He would have caught Ted, who did not notice him in time, but for Jesse.

Young Dane dropped in front of Ralston and the ruffian fell over him just as his fingers clutched Ted by the shoulder.

Tug rolled into the gutter, swearing furiously.

Scrambling to his feet, he drew a revolver from his hip pocket and aimed it at Jesse as the boy was getting up.

Ted, seeing his friend's peril, sprang forward and struck up the drunken rascal's arm just as the revolver exploded.

The ball went through the rim of the hat of one of his cronies, and then smashed a pane in the saloon window.

Ted grabbed his wrist to prevent him using the weapon again.

Jesse piled in to help Ted.

A crowd of excited men poured out of the saloon.

Ralston, with a powerful swing, flung both boys from him and fired at Ted, missing his head by the fraction of an inch.

Before he could repeat the performance half a dozen men flung themselves upon the ruffian, tripped him up and pinned him to the ground.

The revolver was taken from him, and one of the town officers coming up he was carried raving like a madman to the lock-up, but it took four men in addition to the officer to land him there.

Next morning he got thirty days' confinement and a fine from the magistrate.

In addition he was discharged from the mine, to the great satisfaction of the two boys, as well as the miners in general.

CHAPTER III.

SAVED IN THE NICK OF TIME.

During the thirty days that Tug Ralston was confined in jail, Ted and Jesse each Sunday visited the Brown property and prospected it on their own hook.

They were looking for outcroppings of copper ore.

Jesse was fairly familiar with the methods of prospectors, and he possessed a general knowledge of the signs indicating the presence of the metal.

He also was able to pick out the most likely spots where ore would be found, if at all.

They had borrowed a prospector's outfit of hammers and other tools, and employed them in their expeditions.

For three Sundays their search was unsuccessful, but on the fourth, while prying into a break on the hillside, Jesse found undoubted signs of ore in the ground.

"There's a vein of ore in this hill, or I don't know what I'm talking about," said Dane, after critically examining several specimens he had knocked into sections.

"Are you sure of that?" asked Ted excitedly.

"Sure as we stand here."

"Then I'll be right in it."

"Yes, that's a fact, and I wish I was right in it, too."

"So you shall be, Jesse," cried Ted impulsively. "Whatever I make out of this property above its ordinary appraised value you shall have a share of. You're my friend and comrade, and as such you shall be a gainer by any prosperity that comes to me."

"Do you mean that, Ted?" asked Jesse, with sparkling eyes.

"I do. You don't think I'd be so mean as to go back on you."

"No; but still I haven't any right to expect to gain anything out of your land."

"Why, aren't you prospecting it for me?"

"I'm doing the best I can in that direction."

"Of course you are. It would be a good while before I would be competent to do the thing myself. You have also taken an interest in my affairs, and have encouraged me right along when older people have practically turned me down on the question of copper. If we find a copper mine on this ground, I'll see that you come in for a square deal."

Crack!

Zip!

The piece of ore Ted held in his hand flew a yard away.

The first sound was the report of a revolver, and the second the contact of a bullet with the ore.

Both boys cast a startled glance in the direction of the report.

They saw a little curl of smoke rising from the far end of the cleft in the hill where they were standing.

In another moment a face appeared framed in the bushes—the face of Tug Ralston, looking more disreputable than ever.

He had been released from jail that morning and advised to make himself scarce.

He had no intention of making himself scarce until he had revenged himself on the boy whom he considered the cause of his recent troubles.

That afternoon he had learned from one of his cronies that the boys had been seen going into the hills with a prospector's outfit, and after borrowing a revolver he started out to trail them.

He intended to kill or seriously maim Ted—he didn't care which.

As for Jesse, though he had no great love for the boy, he entertained no particular plans—circumstances would decide how he would deal with him.

After trudging around for two hours, he came upon the boys in the cut.

Then he whipped out his weapon and fired at Ted.

The boys were surprised as well as aghast at the unexpected appearance of the rascal.

They thought him still in jail.

They realized their disadvantage in the presence of this man, for they were unarmed and he had a revolver.

"Tug Ralston!" cried Jesse. "And he's got a gun. What shall we do?"

The case looked rather desperate, for they were out in an unfrequented part of the country, a mile from the Lookout mine.

It was Sunday, too, when few of the miners or others went abroad.

"We're in a fix, I'm afraid," replied Ted.

"A bad fix, for that fellow seems disposed to shoot one or both of us. See him grin. He seems to be aware that we're at his mercy."

"Well, young fellers, I've got you where I want you," said Tug, coming from behind the rock which had concealed

him. "That shot was intended to let you know that I was on hand. The next may mean somethin' different. I'm waitin' to see you both get down on your knees and beg me to let you off."

He uttered a disagreeable laugh and advanced toward them, holding his cocked weapon ready for instant use.

"What you doin'? Lookin' for copper? What good would it do you if you found it? Is the owner of this property payin' you to prospect for him?"

He spoke sarcastically.

"Why are you molesting us? Why did you shoot? You might have hit one of us," said Ted, without showing a bit of fear, though he felt that matters were critical.

The rascal laughed grimly at the boy's speech.

"I guessed you didn't know I was out of jail, so I thought I'd surprise you. It's a way I have sometimes when I'm feelin' good," he chuckled.

There was a wicked leer in his eyes which showed that his mirth was assumed.

"Glad to see me, ain't you, both of you? You look it," and the scoundrel laughed again, as though he thought it a good joke.

"What do you want with us?" asked Ted.

"Well, I don't want much with your friend, though he did do me dirt in front of the Mornin' Glory Saloon a month ago; but I think you and me has an account to settle, and I reckon this is about the time and place to settle it."

"Are you thinking of murdering me?" asked Ted, his blood running cold at the bare prospect of such a terrible thing.

"Murderin' you! Haw! haw! haw!" laughed the ruffian, who was playing with his intended victim like a cat does with a mouse. "If I intended doin' that, wouldn't I have done it already without wastin' my jaw on you?"

"Then what do you mean to do?"

Ralston looked at him with an air of fiendish triumph.

"You can go," he said, waving his revolver at Jesse.

"Not without Ted," answered Dane.

"Go, I tell you!" roared Tug menacingly.

Jesse didn't move.

Ralston walked over and struck him a blow with his fist in the forehead which stretched the boy senseless at his feet.

"Coward!" cried Ted, springing on him like a wildcat.

The ruffian turned on him in a towering rage.

"I'll kill you, you infernal young varmint!" he gritted, dropping his revolver and seizing the boy with both of his sinewy arms.

Ted clung to him like a leech, winding both of his legs around one of Tug's, and getting his head around under his arm.

Ralston clawed at him viciously, more like a wild beast than a man.

For some minutes the desperate struggle continued.

Ted felt that he was fighting for his life, with the chances all against him.

At length the ruffian managed to pull himself clear by his tremendous strength.

Then he threw the boy on the ground and put one of his boots on his chest.

"Tackle me, will you, you young catamount! I guess you don't know who you're monkeyin' with."

He glared down at the helpless boy with malignant satisfaction.

Then he removed his foot and picked up his revolver.

"What's to hinder me blowin' your brains out?" said Tug, aiming his gun at Ted's head.

The boy shuddered and closed his eyes.

He fully expected his last hour had come.

Ralston laughed harshly.

His finger was on the trigger, but he didn't pull it.

He enjoyed the pleasure of seeing his intended victim suffer.

He meant to kill him, or perhaps wound him so badly that his death would ultimately ensue, but he was in no hurry about it.

The afternoon was young yet, the neighborhood lonesome and deserted, and he figured that he had things all his own way.

He studied the boy, wondering where he would shoot him first.

Finally he decided that he would frighten him a bit more.

"Now, then, I give you a minute to say your prayers."

Ted opened his eyes and saw the muzzle of the revolver pointed at his head.

"You're a coward! If you kill me, you'll swing for your crime."

"I'll take my chances of that. The minute is up. One—two—three!"

He moved the weapon a trifle and pulled the trigger.

A flash—a report—and the ball plowed into the ground so close to the boy's ear that he could almost feel the sting of it.

"Missed you, did I?" grinned the scoundrel, who hadn't intended to hit him. "Next time I'll do better."

"I don't think you will!" said a clear, girlish voice at that moment.

Tug looked up clearly startled and found himself covered by a cocked revolver in the hand of a swarthy-looking maiden of perhaps sixteen.

CHAPTER IV.

TESS COOKE.

Ted lay still and uncertain as to the issue, but his heart thrilled with hope.

He had heard the girlish voice, and there was a determined ring to it that meant business.

The top of his head was toward the newcomer and he couldn't see her.

He could see, however, that her words and attitude had a strong effect on Ralston.

"Drop your gun, pard," spoke the girl again, "and drop it quick. This gun of mine has a habit of going off sudden-like on occasions, and it never misses. When I see a big chap like you taking advantage of a little fellow it makes me nervous. As my finger is on the trigger, and it's a hair one, something is liable to drop in short order if you make me more nervous than I am."

The girl spoke coolly but significantly.

Tug saw she had him dead to rights and was not to be trifled with.

With a deep imprecation he let his revolver drop to the ground.

"You're sensible, pard," spoke up the girl. "Now, step back a couple of feet. Don't go too far, for something might happen if you did."

Ralston unwillingly obeyed her mandate, but then he couldn't help himself.

He had been having his fun with Ted, now the visitor was having hers with him.

Turn about is fair play, but it isn't always satisfactory to the person who has the short end of the game.

The moment Tug moved back Ted sprang to his feet and looked at the person who had saved him.

She was an uncommonly pretty girl, with a sylph-like figure, and was dressed in wild Western style, her head covered by a soft cowboy hat.

She had seated herself carelessly on a boulder and held her weapon pointed at Ralston in an easy way that was not comfortable to the rascal.

"I'm much obliged to you, miss, for helping me out," said Ted gratefully. "You saved my life, for the rascal meant to kill me."

"You're welcome, pard," replied the girl, taking the boy in from his head down with a quick, comprehensive glance. "Better pick up that gun. It will be safer in your hands than his."

Ted took possession of Ralston's weapon, and then felt that he feared the man no longer.

"What's happened to him?" asked the girl, indicating Jesse. "Not shot, I hope?"

"No. Tug Ralston struck him down with a blow in the face with his fist."

"Oh! So this fellow's name is Tug Ralston? I've heard my dad tell of him. I ain't surprised at anything he might do."

"He's a cowardly cur," returned Ted. "He ought to consider himself more than a match for Jesse and me without drawing a revolver on us. I wish I was nearly his equal in strength and I'd give him the licking of his life."

The girl noted his words with some admiration.

She saw that Ted was gifted with true grit.

"What is your name, miss?" asked the boy.

"Tess Cooke. What's yours?"

"Ted Brown."

"Work at the mine?"

"Yes."

"What's your pard's name?"

"Jesse Dane."

"What are you doing out here? Prospecting?"

"Yes, miss. This is my property, left me by my uncle. Jesse and I were looking to see if we could find indications of copper on it."

"I suppose that fellow surprised you?"

"He did. He hid behind that rock and fired on us."

"Better try and bring your pard to his senses," said the girl.

Ted agreed with her.

He went to a spring near by and brought the crown of his hat full of water, which he threw in Jesse's face.

Then he chafed the boy's temples and he presently revived.

"What happened to me?" asked Dane, in a dazed way.

"Who is that?" he added, as his eyes rested on the girl.

"That is Miss Cooke."

"Never mind the 'miss,' pard," said the girl. "Call me Tess."

Dane then saw Tug Ralston standing against the side of the pass in sullen impotence.

"I remember everything now," he said. "Ralston struck me down with his fist."

"He won't do it again in a hurry."

"What's happened to him?"

"Tess Cooke has him nailed. See the revolver in her hand? That did the business for Ralston just as he was going to kill me."

"Then he intended to shoot you?"

"He did, but Tess Cooke saved me."

"I've heard of her, but never saw her before."

"She's a dandy from Dandyville. She called him down so hard that he just chucked up the sponge."

"She's a wonder," said Dane, casting a glance of admiration as well as respect at the girl, who seemed to be paying no attention to them, but just keeping the big ruffian under her eye.

"Yes, she's a corker, and a mighty pretty girl, too," said Ted, who was by no means insensible to the girl's unquestioned beauty.

"Well, pard," said Tess Cooke, "what are you going to do with this man? You've got his gun. You might amuse yourself shooting a few holes through him."

She spoke in an easy, careless way, as if such a performance was the most ordinary thing in the world.

"You don't mean that, I guess," replied Ted, regarding her earnestly.

"That's what he was going to do to you when I came up and stopped him," she answered. "It's your lead now. You hold a full flush. He's played his hand and lost. If you let him go, he'll pick up a gun somewhere and do you up. Better settle the game while you hold the cards."

Ted wondered if the girl really meant what she said.

He looked at Ralston and saw that the fellow was decidedly uneasy.

He thought he'd test Tug's nerve, though he didn't think the man had much.

"Tug Ralston, you meant to kill me a while ago. If I let you go, you'll try to work the same game over again. I guess I'll have to shoot you to save myself."

"Don't shoot!" gasped the man, his face turning livid.

"Let me off and I'll cry quits."

"It won't pay to trust such a chap as you."

"I swear I'll let you alone after this."

"What guarantee have I that you will?"

"I'll give you my word."

"What's that worth?"

"I'll stand by it."

"Get down on your knees and swear you'll not interfere with me in the future."

Tug obeyed, and swore in his own peculiar way that he'd let Ted alone after that.

"Jesse," said Ted. "Take that bandanna out of his pocket and tie his hands behind his back."

Dane did so.

"What are you goin' to do with me?" asked Ralston.

"Take you to town and deliver you over to the sheriff," replied Ted.

The rascal glared at him, but made no reply.

Ted then turned to the girl, who had put up her revolver.

"I hope you understand that I am deeply grateful to you, Miss Cooke, for saving my life," he said.

"I told you that you were welcome, pard," replied the girl, with a friendly smile.

"I'd like to shake hands with you if you don't object."

"I haven't any objection," she replied, rising from the boulder and approaching him.

They shook hands.

"I hope I'll see you again, miss," he said.

"If you want to see me, you'll find me over at dad's house, a mile up the creek."

"Jesse and I'll call on you next Sunday afternoon, if you'll be home."

"I'll be there if you say you'll come."

"We'll come."

Whether it was that Jesse had made a bungle of his job of tying Ralston, or that owing to his strength the handkerchief failed to hold his wrists, certain it is that Tug freed himself, and, taking advantage of the momentary inattention of the boys, made a sudden break for the end of the cut in the hill.

Jesse gave the alarm, and Ted swung around.

"Stop!" he shouted to the rascal.

The fellow paid no attention to him.

Ted fired at his legs, but the bullet went a trifle wide, and before he could shoot again Ralston had disappeared around the boulder from behind which he had fired his first shot at the boys.

CHAPTER V.

CAUGHT UNAWARES.

Ted rushed after him as fast as he could.

When he reached the boulder he caught sight of the fleeing ruffian some little distance away.

Ted fired at him again and missed as before.

Ralston turned, shook his fist back at him, and then plunged into a thick clump of bushes.

Ted then gave up the pursuit and returned to Jesse and the girl.

Tess Cooke explained how she had heard the first shot at a distance and walked over to the cut to see what was going on.

Just after the second shot she came upon the scene which she had interrupted.

"It seems to me that you're a pretty nervy girl," said Ted.

The girl tossed her head with a laugh.

"It's my way, I guess," she replied. "I've been brought up to look out for myself, and I opine that I can do it."

"I'll bet you can, as well as any man," said Jesse.

They talked with Miss Cooke for perhaps half an hour longer, and then she bade them good-by, saying she would expect to see them at her dad's place on the following Sunday.

Ted and Jesse gathered together their prospecting tools and started for Carson.

Both were satisfied that their search for copper had been successful at last, and they decided to pay another visit to the cut on Sunday morning, bringing their lunch, and afterward go on to the home of Tess.

"It was mighty lucky for you that that girl turned up in the nick of time to save you, Ted," remarked Jesse.

"There isn't any doubt about it. I'll never have a closer call for my life. I could read murder in that scoundrel's eyes. He meant to do me up and then skip the country, for after that it wouldn't have been safe for him to be seen in this neighborhood."

"You're going to notify the sheriff about his attack on you, aren't you?"

"Yes, it's the best thing I can do, for it won't be safe for us to go around the country here as long as he is at large."

"That's right. He ought to be taken care of. It's safe to bet that some day he'll be strung up for murder."

"I wouldn't be surprised. He's a hard nut."

"I should say he is. He's one of the bad men you read about."

The boys reached their home without further adventure, and soon after they had cleaned themselves and spruced up a bit the supper bell rang and they went down to the dining-room.

After the meal the boys went into town and called at the residence of the sheriff of the county.

He was home, and they detailed the adventure they had had with Tug Ralston.

"He was only let out this morning," said the sheriff. "He

didn't lose any time getting back to his old tricks. Well, I'll look after him, and I don't figure he'll escape me unless he's already made tracks for the next county. If I get him, you'll be wanted as witnesses."

"You can send to the mine for us, or to our boarding-house, the Miners' Rest," replied Ted.

"That's a right smart gal—Tess. She's the daughter of old man Cooke, a prospector and mining expert," said the sheriff. "She's accounted a dead shot, and can draw a gun quicker'n any man I ever met. I saw a specimen of her shooting at ten yards one night at the Wyoming Saloon, where she went to fetch her father, who has a periodical weakness for crooking his elbow. The old man didn't want to go home with her, and the gang who had him in tow backed him up. She drew her gun on the ringleader, but he only laughed at her, and said he guessed she was only good to be kissed, and he calculated he'd honor her by giving her the first smack. 'I'll show you what I'm good for!' she said, in a tone that rang business. 'Tack a five-spot on that wall yonder, and if I don't nail every pip square in the center you can keep my father here and kiss me into the bargain.' 'Done!' replied the chap. 'If you win, the old man goes with you.' 'I guess he will,' she replied coolly, 'for I'm going to keep one shot for the man that tries to prevent me taking him.' Somebody put the card against the wall and the crowd looked for fun. Well, blame me if that gal didn't plunk that card in five seconds with five balls, every one as true as a die. The crowd was paralyzed. Then she called her old man and told him to walk. 'Has any one got any objections!' she asked, looking around with her smoking gun in her hand. Nobody had, and so she led the old man away, and since that day the whole town takes its hat off to Tess Cooke."

"I don't wonder Tug Ralston gave in when he saw who he was up against," laughed Ted. "How came she to learn to shoot so good?"

"I'll never tell you. It comes natural to her."

"It's lucky for me that she had her gun with her to-day."

"She always carries it. She needs it for her protection, for a pretty girl like her attracts a whole lot of attention. It is said that no man but her father has ever kissed her. Several men have boasted that they were going to do it at the first chance they got. She heard about it and sent them word that if they could kiss her quicker than she could draw her gun, they were welcome to, but she gave them to understand that the man who failed would be a subject for the undertaker. Probably that's why she carries her weapon. At any rate, no man has yet had the nerve to tackle her, for her old man said he'd better make his will first."

"Tess Cooke seems to be a corker," said Ted to Jesse on their way home.

"She is, for fair. I've heard a whole lot about her since I've been in the mine, but to-day is the first time I've seen her."

"I wonder why she don't live in town instead of up along the creek?" said Ted.

"If you're curious to learn, you'll have to ask her, for I don't know. Maybe it's on account of her old man."

"You mean she can't trust him where there are so many saloons?"

"Very likely. It's not so hard to keep him sober when he's away from temptation."

The ensuing week passed away all too slowly for Ted.

He was continually thinking about Tess Cooke, and the visit he and Jesse were pledged to pay her on the following Sunday afternoon.

He knew many pretty girls in Petersville, and in the vicinity of the farm where he was raised, but none of them could hold a candle to Tess.

Then her fearlessness appealed to him.

She was a girl after his own heart—a girl who could face the world unflinchingly.

In a word, she was one in a thousand, and that was the kind of girl he took his hat off to.

As the days passed, no word came from the sheriff with respect to Tug Ralston.

"The rascal must have left the district," Ted said to Jesse, as they were on their way to their boarding-house after work.

"Sure thing," replied his friend. "If he hadn't, Sheriff King would have nabbed him before this."

"It's a good thing he's lit out. I should never feel quite easy while he was about. He has it in for me good and hard, and under those circumstances I have no wish to meet him at a disadvantage again."

"I should say not. He'd shoot you as quick as a wink. He only played with you last Sunday because he thought there was no escape for you. If he met you again, he wouldn't take any more chances."

"That's just the way I look at it. I'm not yearning to become an angel yet a while. I've a whole lot to live for."

"A copper mine, for instance," grinned Jesse.

"Yes. If I've dreamed once I've dreamed every night about that mine," said Ted. "Last night I thought I was worth a million. Had a fine office in a big city, owned a private car, two or three automobiles, a steam yacht, and I don't know what."

"That must have been a dandy dream."

"It was while it lasted; but when I woke up and found I had to go to work in the mine just like the rest of the boys, I tell you the reality tasted mighty bitter in my mouth. I'd rather not dream such things."

"Maybe your dream may come true one of these days."

"I hope it may. It can't come any too quick for me. This kind of life is too strenuous for my blood. I like to move around in the sunlight. I've been used to that all my life. This delving down in the gloom of the tunnels is something fierce. I mean to stick it out, though, for I'm not a quitter. I'll stick to it till Fortune takes a turn in my favor."

"What does your mother say about you staying out here?"

"She doesn't like it. She's always begging me to come back home. Says she misses me terribly. That I'm her only boy, and so on. I tell her to have patience. I wrote her Sunday night that we had found every indication of copper on my property, and that in my next I hoped to be able to assure her of the fact beyond any reasonable doubt."

"Don't you worry but there's copper on your land. It's there. The only question is whether it's in quantities large enough to warrant working. I'll find that out for you next Sunday, I hope. I'm almost sure we struck a big vein in that hill. If the vein amounts to anything, your fortune is made."

"And so is yours, Jesse. You shall ride in your own automobile, too."

"Gee! I hate the blamed things. Give me a horse for mine. I like to feel flesh and blood under me. Those machines are always breaking down when you aren't looking for it, then you have to crawl under them in the dust and fix up something with a wrench, or put more gasoline into the tank, or do something else."

"Oh, you'd get used to them after a while and you wouldn't give your machine up for a farm. I've heard people talk like you before, and sooner or later they eat their words. An auto is the greatest thing on earth. Get a high-power one, and it will make half the railroad trains look like thirty cents for speed. When I get rich the first thing I'll buy will be an auto, and the best I can find."

At length Sunday came around, but it brought an unexpected change of programme.

Jesse met with an accident in the mine Saturday afternoon, and the doctor said he'd have to stay in bed for several days till his leg mended.

Ted would have postponed his trip to the cut on his property only for the fact that he was impatient to see Tess Cooke.

The girl was on his brain, and nothing would satisfy him but he must keep his engagement.

Under those circumstances he decided that he might as well look in at the cut on his way over to her home on the creek.

So he took a few of the tools after dinner, bade Jesse good-by, and started.

He reached his property and made his way to the cut.

There he spent an hour picking up specimens which he intended to take over and submit to Miss Cooke's father's inspection.

He was an old and experienced prospector, and his judgment on the ore was to be relied on.

Ted filled his bag with bits of the ore he secured from the cut and then started for the creek.

His way took him through a wood, and the afternoon being warm, he sat down to rest himself for a while.

While lolling in the shade of a big tree with a thick, round trunk, he examined his specimens with a feeling of satisfaction.

"There is copper in these rocks beyond doubt. Plenty of it. I know what copper is by this time. I see enough of it every day, goodness knows. If I ever get to be president of a copper company I'll be able to talk facts from practical experience. Some day the papers may have something to

say about me—that is, if I become one of the copper barons. Something after this fashion: "Theodore Brown, the wealthy copper king, was once on a time a boy copper miner. He

Ted didn't get any further with his castle-building.

He suddenly heard a noise in the bushes in front of him, and looking in that direction he saw to his dismay the villainous-looking countenance of Tug Ralston within a couple of rods of the spot where he sat.

CHAPTER VI.

TREED BY THE ENEMY.

Ted sprang to his feet with extraordinary agility, but Tug had seen him and was evidently prepared for the encounter.

"Stop where you are!" he roared in a hoarse, snappish voice, raising himself and covering Ted with a rifle. "If you move an eyelid, I'll drill you quicker'n a flash of lightning."

The boy, realizing that he was in a bad box, made no further movement, but watched his enemy with a wary eye.

Ralston looked cool and impudent as he stood there gloating over the situation.

He also looked very much the worse in general appearance.

His face was drawn and cadaverous, and somewhat resembled a famished hyena.

His tangled hair and a ten days' growth of beard added to his fierce look.

"I guess I've got you at last, Ted Brown," he growled. "I've been waitin' a week for the chance, but I knew it would come, for I counted on that visit you was goin' to pay to that she-cat who saved your life last Sunday. Well, she won't save you this time, you can gamble on it. Lightnin' don't strike twice in the same place."

Ted looked at the rascal with critical attention.

He saw that he held his rifle in his hands in such a way that the muzzle of it could easily be brought to bear on his victim.

The boy was rapidly revolving some plan in his mind that would help him to escape his vindictive pursuer.

In order to gain time, he opened up a conversation.

"I guess you're joking, Ralston, aren't you? You swore not to interfere with me hereafter."

"S'pose I did. I've changed my mind since."

"But an oath is an oath. You've no right to go back on that."

"I've a right to do as I please."

"I s'pose that's the reason you've been letting your beard grow."

"Don't you worry about my beard. I shaved before you was born, and I sha'n't shave again till after you're dead; but I guess I won't have to wait long, for you ain't got more than three minutes to draw your breath."

"How long?"

"Three minutes."

"That isn't very long."

"It's long enough for you to say your prayers in."

"Do you mean to say you're going to shoot me?"

"If I said I wasn't I'd be the worst liar on two feet," replied Ralston grimly.

"What good will that do you?"

"That's my business."

"Don't you know that would be deliberate murder?"

"Well, it won't be the fir—the three minutes are up. If you'll shut up and say your prayers, I'll give you two more."

"If you shoot me, you'll make the mistake of your life, and I can prove it to you in less than five minutes," said Ted desperately.

"No, you can't; so don't waste your time tryin'. If you want to say your prayers, blaze away lively, as I'm tired chinnin' to you."

Ted looked into that hard, relentless eye, but there was not the slightest indication of any change of purpose.

"Do you think it's a brave act to shoot a boy?"

"Shut up and say your prayers if you mean to; but I don't believe the prayers of a kid like you amount to much," replied Ralston, with a sneer.

Ted's object had been to try and distract Ralston's attention so that he might dart behind the trunk of the big tree

at the foot of which he had been sitting; but in this he failed, for Tug never for a moment took his eyes off him.

Several times the scoundrel half raised his rifle as if to fire at the boy, but dropped it again.

Ted, finding that his enemy was watching him like a cat does a mouse, began to lose hope.

It didn't seem possible that he could escape the fate Ralston had evidently marked out for him.

As a last desperate resort Ted adopted an old, threadbare ruse.

It required good acting on the boy's part to make it pass muster, but as his life was at stake he threw his whole soul into it.

"Quick, Jesse!" he shouted earnestly, looking straight behind Tug, as if he saw his friend in the bushes. "Hit him!"

Tug Ralston was deceived and thrown off his guard.

He swung around to ward off a threatened rear attack, but saw nobody there, nor did he hear the slightest sound in the bushes.

Then he realized he had been deceived by Ted.

With a terrible imprecation, he turned back again, only to find that his victim had disappeared.

Ted had slipped behind the tree, which was wide enough to conceal him completely.

Ralston was deeply chagrined at the march the boy had played on him, and he swore like a trooper.

His first impression was that the boy had rushed for the bushes and hid himself, and he prepared to start after him.

A moment's reflection altered that view.

There was quite an open space around and behind the tree, and the ruffian calculated that Ted could not have covered it and vanished in the short space of time his ruse had given him.

The only other refuge in sight was the tree, and there he judged the boy was hiding.

"I'm on to you, Ted Brown," he growled with a ring of satisfaction in his tones. "Come out from behind that tree."

Ted refused to accept the invitation.

"All right, youngster, if you won't come out, I'll have to go there and blow your roof off."

Thus speaking, Ralston moved toward the tree.

Ted's ruse would only have gained him a few minutes of life but for the fact that on this occasion he was armed.

He had taken the precaution, on general principles, to fetch Ralston's revolver along.

It was fortunate, indeed, that he had done so.

Had the rascal entertained any such suspicions, he would have been more cautious in his movements.

As it was, he adopted none of the precautions which such a knowledge would have imposed on any reasonable man.

Ted heard his heavy footsteps in the grass and stood with the cocked weapon in his hand awaiting the climax of the desperate adventure.

He didn't dare look around the tree to see how close Ralston was, lest such an exposure of his person might lead to fatal results.

Nor could he tell around which side the scoundrel was coming.

He could only trust to luck.

Ralston, however, made a bad mistake at this point.

He stopped and spoke again when within a yard of the tree.

"I'll give you one more chance to come out and five minutes to say your prayers," he said.

Ted, hastily taking note of the location of the voice, thrust his revolver around the tree and fired.

A howl of pain and rage followed the shot.

Ralston, slightly wounded by the bullet, hurriedly retreated to the bushes, where Ted could hear him swearing and growling like some disappointed wild beast.

Ted, however, had only checked, not defeated him.

The boy listened with intense anxiety to discover the next movement of his wily enemy.

He was afraid to look around the tree lest Ralston might be on the alert for such a move on his part and put an ounce ball in his brain.

The villain, having a wholesome respect for a weapon in another person's hand, kept under cover of the bushes and waited for Ted to do something.

He held his rifle ready for business, and kept his relentless eye on the tree.

As nothing happened for full five minutes, which seemed an age to him, he began to grow impatient.

He wondered angrily how long Ted proposed to remain behind the tree.

The boy was willing to remain there indefinitely in order to escape the bullet of his foe.

That was a natural conclusion, but it didn't jibe well with Ralston's feelings.

He cursed himself for not having shot Ted in the first place when he had him under his eye.

The truth of the matter was that it was his nature to play with his victim, and for a second time by yielding to that temptation his quarry had escaped him.

However, he hadn't actually lost Ted this time.

The end was only deferred.

While he was snarling under his breath at the lapse of time, a brilliant idea occurred to his mind.

He wondered why he had not thought of it before.

With a grim smile at his own astuteness he rose from his crouching position and began to circle around the tree.

He calculated that when he reached a certain point of the circle he would be able to see Ted behind the tree.

It was impossible for him to carry out this plan in complete silence.

Ted's sharp ears heard the rustling of the dried branches beneath his tread, and the occasional snapping of a twig.

He wondered what game Ralston was up to.

As he listened, the sound at length told him that the man was trying to outflank him.

As soon as Ted realized this move on his adversary's part, he began to move an inch at a time in the reverse direction.

In this way he was able to easily defeat Ralston's tactics, which were singularly deficient in range, for nothing but a surprise could make them successful.

While the rascal was moving a hundred rods to secure his position, Ted could foil him by taking a single step.

In the course of a short time Ralston discovered that he was not so bright as he thought he was.

Finally, fully satisfied that his strategy was a failure, he squatted down again in the bushes to await a demonstration on the part of his victim.

Ted, finding that his enemy had grown tired of pursuing an unprofitable game, remained where he was.

Every little while he could hear Ralston cursing at the delay, but the man's impatience did not worry him any, though he was himself anxious to bring the contest to a conclusion, for his perilous position was calculated to wear on his nerves.

The game, however, promised to be prolonged to a most unreasonable length.

While he listened intently for any sounds that might indicate a new move on Ralston's part, Ted kept up a lively train of thought.

He knew his enemy was watching the opposite side of the tree with great intentness, and the happy thought occurred to him to try to draw the man's fire by a bit of strategy which was as old as the hills.

He had read of the scheme in some boy's book where it had worked successfully.

He wondered if he couldn't dupe Ralston by it.

Slipping off his jacket, he rolled it up so as to form the resemblance of a head.

Placing his cap upon the top of the bundle, he cautiously exposed the dummy on one side of the tree, withdrawing it suddenly two or three times to increase the delusion in the mind of his enemy.

At first no results followed, and Ted began to think that Ralston was not to be fooled this way.

After repeating the operation several times, he slowly pushed the dummy around the opposite side of the tree.

The crack of Ralston's rifle broke the silence of the wood, and Ted felt the blow of the ball when it struck the cap.

The critical moment had come, and without the loss of a second Ted left the security of the tree and darted off in the direction of the creek.

Although strong and big, he was no match for Ted as a runner.

Seeing that his victim was bound to get away, Tug stopped, shoved another cartridge into his gun, dropped on one knee, and fired just as Ted vanished around a clump of bushes.

The bullet passed within a yard of the boy, who kept on till he reached the creek.

Then he ran up the stream for a quarter of a mile, when he saw a neatly built, story-and-a-half house.

In a few minutes he was knocking smartly on the door, while he kept his eyes over his shoulder on the lookout for Ralston.

The door was opened by Tess Cooke, and Ted staggered inside and sank down exhausted by the run and the tense excitement through which he had just passed.

"What's the matter, Ted Brown?" asked Tess, in some concern.

"I was nearly shot by Tug Ralston," gasped the boy, as he tried to pull himself together.

"By Tug Ralston!" cried the girl. "I thought——"

"He had skipped the neighborhood? Well, he's fooled the sheriff and everybody else into that belief. He's been in hiding—waiting to catch me to-day when I called on you. He heard Jesse and me make the arrangement with you last Sunday afternoon at the cut, and he kept it in mind. This time he's got a rifle."

"A rifle!"

"Yes. I wouldn't have cared so much if it had only been a revolver, for I had one myself, and am not afraid to meet him on even terms; but a rifle put all the advantage of the situation in his hands. He caught me off my guard, and had me dead to rights. He could easily have killed me while we stood talking."

"What prevented him?"

"The same thing that held him off in the cut long enough for you to come up and save me—his desire to play with me before he did me up. He wanted me to suffer the anticipation of coming death. Well, I fooled him with an old trick."

Ted then told the whole story of his strenuous adventure to the girl.

She heard him in silence, expressed her sympathy for him, and then went outside to the kitchen where her father was smoking and reading a magazine.

She brought him into the room and introduced Ted to him.

"Now tell your story over again to father," she said.

The boy did so.

The old man knitted his brow during the recital.

"Then he knew that you were bound here?" he said.

Ted nodded.

"He'll lay for you when you start to return. But don't be alarmed. Tess and I will see that you get back to town all right, and the sheriff shall be notified that the rascal is hanging around here trying to get back at you."

Ted soon got over his scare and passed several hours very pleasantly with the girl and her father.

He had supper with them, as a matter of course, and during the meal the young copper miner told old man Cooke about his property and the plain evidences he had found of copper on the ground.

"I brought a bag of specimens to show you, Mr. Cooke, but left it under the tree where Ralston attacked me."

Ted described the tree and told the prospector he would find the bag there if he looked for it during the week.

"I should like to have you examine the specimens and tell me what you think about them. I should also like you to go to the cut on my property some time when you have the time and look at what my friend Jesse says is the beginning of a vein of copper ore. Whatever trouble you're put to I'll make it all right with you."

"Dad will do it for you without charging you a cent," spoke up Tess.

She showed an interest both in Ted and his hopes of a copper harvest, and there is no doubt that if her father was not particularly interested she intended to make him investigate the matter for the boy.

When Ted said he guessed that it was time for him to go, Tess and her father got ready to accompany him.

The old man got his boat out and the three slipped quietly down the creek to a point below Ted's property.

Then they cut across the country, passing close to the Lookout mine, and left Ted at the door of his boarding-house.

He thanked them both, especially Tess, for their kind-

CHAPTER VII.

FUTURE EVENTS CAST THEIR SHADOWS BEFORE.

Ralston uttered a yell of rage on perceiving that his shot had failed of results, and he started after the boy as fast as he could.

ness, and accepted an invitation to call at their house soon again.

Next morning the sheriff was informed about the incident in which Ted had nearly lost his life the preceding afternoon, and, calling a larger force of deputies together, the posse started to beat the neighborhood up with the view of capturing Tug Ralston.

The rascal, anticipating such a move, took time by the forelock and disappeared, and the strictest search proved unfruitful.

Of course, Jesse was surprised and much concerned when Ted related his adventure to him.

"That villain seems determined to get you," said Jesse. "He's taken a fearful grouch against you on account of that little incident in the mine. It would have been better if you had not resented his act of pulling you out of the car. You had to wait for the next cage, anyhow. I'm mighty sorry that the fall he got on his head didn't kill him. It would have been a good riddance if he had been planted in the cemetery. As it is, you'll never feel thoroughly safe until he's shot or put behind the bars for a long term."

"There is no use crying over spilled milk, Jesse. Although I'm sorry that I put my foot in it, I don't much regret that smash in the eye I gave the villain. I only hope that the next time we meet it may be on even terms."

"He's not a chap that's willing to give an enemy a fair show. He's a born coward, even if he is as strong as a small Samson. I doubt if he would attack anybody without getting the bulge on him beforehand. That poor fellow he killed in the mine had no show to defend himself, I'll bet. You are uncommonly fortunate to have eluded him twice after he had you in a corner."

Ted agreed with him, and after that he made it a point always to carry his revolver.

On the following Sunday, Ted and Jesse went over to call on Tess.

The girl gave Ted a particularly warm welcome.

It was evident that she had taken a great fancy to him, and the feeling was reciprocated by Ted.

Old man Cooke also showed a friendly attitude toward the boy.

It soon developed that he had been over at Ted's property and had made investigations that proved beyond doubt that there was a rich lead of copper ore on the boy's land.

"If you want me to bring the facts to the notice of the officers of the Lookout mine, you're bound to get a good offer for your ground. I should say that it will not be under a hundred thousand dollars."

Ted's heart jumped with satisfaction, and Jesse's eyes sparkled.

"I would suggest, however, that you keep the matter dark for the present," said the old man. "The copper won't run away. I will make further investigations later on which I hope, for your sake, will prove the ground to be much more valuable than I figure it at present. You are young yet, and have no need to rush things. In my opinion, you would do better to get some responsible person in whom you and your mother have perfect confidence, to form a company, in case future developments warrant it, and mine the ore independently of the Lookout people. In that way your interests would be fully protected, and you would eventually obtain much larger results than you would secure by selling the ground as it is for even a sum that might be considered handsome."

Ted thanked Mr. Cooke for his advice, and told him that he intended to follow it.

"It is the goal of my ambition to become the head of a copper mine. It would give me a steady income, and the principal would be out of my reach unless I chose to sell my stock and get out of it," replied the boy.

After supper, while the prospector and Jesse were arguing some matter connected with mines and mining, Ted and Tess slipped outside and took a quiet stroll along the bank of the creek.

It is not necessary to record what they said to each other on this occasion, as it wouldn't interest the reader, but there is no doubt that the conversation and the walk proved very satisfactory to themselves.

Ted made the most of his opportunity to make himself solid with the girl, and she exercised all her fascinations upon him, so that when the time came for them to part they had a warmer feeling for each other than that of brother and sister.

CHAPTER VIII.

THE DISAPPEARANCE OF TESS COOKE.

Several weeks passed away and nothing more was heard from Tug Ralston.

Every Sunday Ted and Jesse walked over to the Cooke home together and took supper, after which Tess and Ted invariably disappeared together.

Jesse didn't say anything, neither did the old man.

Both seemed to understand how the wind blew.

If the prospector had any objection, the boys didn't hear of it.

At any rate, it wouldn't have counted much, for Tess ran the ranch, and whatever she said or did was law with her father.

He loved his daughter as much as any parent, but unfortunately he also had a strong regard for bug-juice.

Tess had succeeded in weaning him away from the Carson saloons by a compromise which permitted him to keep a private jug at home.

But it was against orders for him to get a jag on.

Tess had gauged the number of drinks he could take from morn till nightfall when he was at home and keep sober, and set the limit, beyond which he did not go.

He had his orders when away from home, and if he overstepped the mark the girl generally found it out and read him the riot act.

Although the sheriff was of the opinion that Tug Ralston was a long way from the neighborhood of Carson, such, however, was not the case.

He was in hiding not many miles north of the Lookout mine.

His retreat was an underground cavern in the midst of a thick wood.

Entrance to it was to be had through the hollow trunk of one of the giants of the forest.

Tug discovered it one day by accident.

While trying to throw the sheriff's posse off his scent, he entered a thick clump of bushes, and while squeezing himself as far back as possible he found an aperture in the outer bark of the tree big enough for a man to pass through.

He lost no time taking advantage of this refuge, but as the interior of the tree was as dark as pitch, he did not notice there was a big hole there, through which he tumbled before he knew what had happened to him.

When he recovered his wits he struck a match to find out what kind of a trap he had fallen into.

To his amazement he found himself in a subterranean room which was evidently the work of man.

The place had been dug out and roofed with boards braced like the tunnel of a mine.

It was divided into two sections by a bulkhead, with an opening for communication.

The floor and walls were of earth, beaten hard.

The only means of entrance and egress was through the hollow tree, and Ralston found a rope ladder hanging down from one side of the hole through which he had fallen.

Clearly this retreat was the work of men, probably outlaws, who required a secure haven of refuge when pursuit was hot.

Tug found rude wooden benches, a rough table, capable of seating a dozen men, a supply of pots, pans and other cooking utensils, quite an outfit of coarse crockery piled up in a cheap-looking closet with shelves, a small keg nearly full of whisky, a rifle (the same that he used subsequently against Ted), a cartridge belt, and various other things of a miscellaneous nature.

The place had evidently been deserted for months, if not for years, and Ralston was tickled to death over it.

"I can lie here as snug as a bug in a rug for as long as I please and the sheriff will never smoke me out," he said to himself in a tone of satisfaction. "All I need is grub, and I guess I'll be able to pick up a supply of that, while these's whisky enough here to last me six months or more. I call this a regular find. I'm safer here than I was in the next State."

Looking into the next room, he found a dozen litters of straw, each covered with a pair of army blankets.

This was the bedroom of the gang that built the cavern.

"By jingo!" he ejaculated, with a grin. "This is as good as a cheap hotel."

There were farms not so far away, upon which Ralston

descended in the dead of night and supplied himself with eggs, poultry, and even a sheep.

There was a pit not far from the tree in which he made a fire and cooked his food after dark.

It was not necessary for him to do this more than twice a week, and he only did it once in the week immediately after his last attack on Ted, and during that interval he seldom ventured to the surface.

Although he became grouchy for lack of congenial society, he did not dare notify any of his old cronies of his proximity, so he amused himself playing solitaire, filling up on whisky and sleeping off its effects.

As time passed he began to figure again on getting back at Ted Brown.

He also felt a strong resentment against Tess Cooke because she rescued Tom from his clutches.

He would have liked to get square with her, too, but he knew her reputation as a pistol expert and a fearless girl, and was afraid to tackle her.

Tess had the habit of taking long walks or rides around the country.

One day she rode out to visit a girl friend who lived on a farm not far from the wood where Ralston's subterranean retreat was situated.

On her way back home she skirted the wood.

Tug happened to be airing himself above ground at the time, and saw her coming.

He shrank back among the bushes so that she would not recognize him.

He didn't dare molest her, for he knew she carried her revolver with her, and he had no desire to stop a bit of cold lead.

The girl and her mare were nearly opposite to him when a dog suddenly burst through a thicket and sprang barking at the horse.

The animal, taken by surprise, shied, and the girl, though a fine rider, was thrown to the ground.

The shock partly stunned her.

Ralston saw his advantage, and availed himself of it.

He sprang forward, took the revolver from the small holster attached by a belt around her back, then gagged and bound the girl with his own handkerchief and hers.

Seizing her in his arms, he quickly carried her to the hollow tree, down the rope ladder, and threw her on one of the straw beds.

There he left her to recover her senses.

An hour later the mare turned up at the Cooke home.

The old prospector knew at once that something was wrong.

He hardly believed that his daughter had been thrown by the animal.

It was his impression that somebody, probably two or three men, had attacked her unawares, and after robbing her of the few dollars she always carried, had let her go to find her way home on foot.

After waiting an hour for her to turn up, he started to look her up, taking the road he knew she had followed to go to the Golding farm.

Finding no trace of her anywhere, he kept on to the farm.

There he learned that she had started for home several hours before.

His anxiety over her was so great that the farmer and two of his help mounted horses and accompanied him back.

They looked everywhere along the route that she was believed to have taken, but found no signs of her.

When they reached the cottage it was dark and silent, just as the prospector had left it.

Old man Cooke was now seriously alarmed for his child.

He and the farm people rode back and scoured the country for hours without result.

The disappearance of Tess was a great mystery, and her father had never been so broken up before, unless it was when his wife died some years before.

CHAPTER IX.

IN WHICH TED FINDS TESS.

It was late Saturday afternoon that Tess Cooke disappeared, and next morning the news was known in town.

The sheriff was a particular friend of old man Cooke, so the prospector appealed to him to help find his daughter.

The officer called his friends together, and off they went to the neighborhood where the girl had vanished.

Ted heard the news about the middle of the forenoon.

"Say, Jesse," he cried, rushing up to his chum, his face ablaze with anxiety and excitement, "I've just learned that something has happened to Tess Cooke."

"Something happened to her!" ejaculated Jesse.

"They say she's disappeared, and her old man is crazy about her."

"Why, where could she disappear to?"

"That is what is bothering her father. Get your coat on; we must go out to his house and find out if this report is really true. I couldn't rest a minute if anything has happened to her."

"You think a whole lot of her, don't you, Ted?"

"Bet your life I do. Why shouldn't I, when she saved my life?"

"You'd be willing to save hers, too, if that was necessary."

"I guess I would. I'd go through fire and water for her."

Ted set a hot pace, and inside of an hour they reached the Cooke home.

They found the old man and several men who had just returned from another unsuccessful search.

In a few words the prospector told the boys the little he knew about the disappearance of his daughter.

He also told them about the close search he and several men had made of the country, and how the sheriff and a considerable force were still at it.

"You can't tell just where she might have met with an accident, can you?" said Ted.

"No; but she disappeared somewhere between here and the Golding farm."

Ted asked where the Golding farm lay, and then he and Jesse started off in that direction.

When they reached the wood, they stopped to rest, and, as luck would have it Ted sat on the grass in the very spot where the girl was thrown.

While fanning himself with his hat, he saw something sparkle in the grass.

He picked it up and looked at it.

He recognized it at once as the locket containing his picture which he had lately given Tess.

"Look here!" he cried to his chum. "Tess has been here. This locket belongs to her. I gave it to her last Sunday. See where the thin chain snapped off? We must hunt around here. If she was thrown by her mare and hurt, she may have crawled some little distance in the grass, and then been unable to go farther. You hunt in that direction and I'll take this."

The boys started to search the immediate neighborhood with great zeal, and gradually became separated.

Ted's course took him close by the great hollow oak.

His sharp eyes detected that the grass and earth thereabout were well trampled by heavy boots.

He also found a small piece of Tess's dress hanging to a sharp twig.

"Looks as if she was overpowered and carried off by some men," he muttered. "They seem to have passed through these bushes."

He worked his way in that direction and presently came face to face with the opening in the tree.

"This old tree appears to be hollow," he breathed. "Can it be that the scoundrels have killed the girl and shoved her body in there?"

His heart stood still at the bare supposition of such a thing.

He looked in at the opening, but could see nothing.

Then he flashed a match inside.

He perceived at once the hole leading downward through the roots.

He lighted a second match and held it down the hole.

His astonished eyes lighted on the rope ladder, swinging against the wall.

Evidently it was there to afford communication with the bottom of the hole.

There must be some reason for that fact.

While Ted was wondering what the meaning of it all was, the match expired in his fingers.

"Looks to me as if there was a pit or cave down there," he mused. "I've a mind to go down and see."

He leaned as far down as he could and listened.

He heard nothing.

"Well, I'm going down to see what's there, at any rate. It won't take me more than a minute or two."

Having come to this resolution, he crawled inside the tree, felt for the upper rung of the rope ladder, and then began to descend into pitchy darkness.

The place seemed to widen out around him, but he could see nothing.

At last he touched the solid ground.

Turning around, he was about to strike a match when he saw a faint gleam of light twenty feet away.

That indicated that there was somebody there, and Ted stopped and put his hand on the butt of his revolver.

As an intruder, he was liable to be up against trouble, and he wanted to be prepared to meet it.

It struck him that it would be more prudent for him to return to the surface and summon Jesse to back him up.

He began to entertain a strong suspicion that Tess Cooke might be a prisoner in this place.

In no other way could he account for her mysterious disappearance.

While he stood undecided as to what he should do, he heard the gruff tones of a man's voice where the light was.

The place appeared to be divided in two parts, the man and the light being in the farther one.

Ted decided to risk striking a match.

He did it on his trousers leg, and he caught a brief survey of the underground room before him, and the outline of the bulkhead beyond.

He located the long table, the benches and other impedimenta before the match went out, and had satisfied himself that there was no one that side of the bulkhead.

As Ted listened, he heard another voice reply to the gruff one.

It sounded as if it might be a girl's.

The very suspicion that it was thrilled the boy.

He determined to make sure.

With great caution he made his way to the opening into the section beyond the bulkhead, holding his revolver in his hand.

Before he reached it he had heard and recognized Tess's voice.

The man's voice also had a familiar ring.

It hardly needed a sight of the fellow's villainous features to satisfy him that it was Tug Ralston who was threatening Tess, like the coward he was.

It made Ted's blood boil to think that the girl of his heart was at the mercy of such a scoundrel.

But it shouldn't be for many moments more if he could help it.

Glancing through the doorway, he saw Tess lying with her hands bound behind her upon one of the beds.

She regarded her captor and tormentor with her customary fearlessness.

As far as the wordy contest went, Ralston was getting decidedly the worst of it.

He seemed to be partially under the influence of liquor.

"Well, I've got you, at any rate, and, what's more, I'm goin' to keep you here till I've shot that young fool, Ted Brown. Then I'll light out and you can go back to your old man," Ralston was saying.

"If you should shoot Ted Brown, you'd better order your own coffin at the same time," retorted Tess, in a tense tone. "I'd follow you to the end of the earth if I had to, and I'd shoot you down like a dog at the first chance I got."

"Yah! You little spitfire!" snarled the rascal. "I believe you would do it, but I'll take good care that you never find out where I've gone."

"I'd find you if it took me years to do it, and when I did I'd put so many holes into you that you'd look more like a sieve than a human being."

"You talk to hear yourself, gal," sneered Ralston. "They say no man has ever dared to kiss you because you're so handy with your gun. Well, I reckon I'm goin' to kiss you now, with or without your consent."

"If you do, you'll regret it, as sure as my name is Tess Cooke," replied the girl fiercely, her eyes flashing fire.

"I'll take my chances on that," he chuckled, with a tipsy leer. "And what's more, I'm goin' to kiss you every day while you're here, d'ye understand?"

He advanced on the girl with an unsteady step, and, leaning over, seized her helpless form in his arms.

She struggled as best she could to evade the pollution of his rum-soaked and tobacco-sodden lips; but even had her arms been free her strength would have availed her nothing against his.

She felt his reeking breath on her face, and uttered a cry like a wounded animal, when—smash!

The butt of Ted's revolver descended on the rascal's head, and he dropped like a steer stricken in the shambles.

CHAPTER X.

THE FIRST KISS.

"Tess!" cried Ted, pushing the insensible scoundrel aside with his foot. "It is I—Ted, come to save you!"

He raised her in his arms, and as her eyes met his in the gloom even of the place, she knew him, and uttered a thrilling cry of delight.

"Ted, Ted!" she exclaimed, and dropped her head on his shoulder.

He thrust his revolver back into his hip pocket, and set to work to unloosen the knot of the handkerchief that held her wrists together.

"Yes, it's me, all right, and Jesse is outside, too," he said as he worked away.

"Oh, Ted, I'm so glad you've come to save me from that brute. Had he succeeded in kissing me I believe I should have killed him the moment I got a weapon of any kind in my hands."

"Never mind, Tess. Calm down. He didn't kiss you. I'm afraid I should have shot him myself if he had done so. As it is, if I haven't broken his skull it's because it's an uncommonly thick one."

As soon as her arms were free she threw them impulsively around Ted's neck and looked lovingly into his face.

Then, before he knew what was coming, she kissed him full on the lips.

"There, I've done what I never did before in my life to any one but my father and mother," she said with a rich flush on her face; "but I couldn't help it. I love you, Ted, and I don't care who knows it."

"And I love you, too, Tess, with all my heart."

As he uttered the words he kissed her as she had kissed him, and she smiled contentedly in his face.

"And now let us get away from this place," he said, releasing her. "But first we must secure this rascal so he will not be able to escape until the sheriff comes after him."

Ted tore one of the blankets in strips, and bound the fellow's arms behind his back, both at the elbows and at the wrists.

Then he tied his legs together.

While he was doing the latter Tess spied the butt of her revolver sticking from Ralston's hip pocket, and she immediately secured it.

Leaving the ruffian where he was, to recover his senses without aid, the boy took up the candle, stuck it in the neck of a bottle, and, with Tess by his side, walked into the other section of the underground cavern.

He placed the bottle on the table.

"This is a wonderfully secure retreat, Tess," he said, leading her toward the rope ladder. "The only entrance seems to be through a great hollow tree above, the opening to which is hidden by the bushes. It was made by human hands, you can easily see, and it must have taken a bunch of men to do it. Has Ralston any companions to your knowledge?"

"I have neither seen nor heard any one beside him since I was brought here yesterday afternoon," she answered.

"Then he may have accidentally found this place and was occupying it alone until he captured you. You shall tell me by and by how he managed to get you in his power, Tess."

"I can tell you now in a very few words," she replied. "While passing through this wood on my return from a visit to the Golding farm yesterday afternoon my mare was startled by the sudden appearance of a strange dog, and threw me. While I was suffering from the shock Tug Ralston came upon me, took my revolver away and then, after binding me with his handkerchief, and tying my own across my mouth, he carried me down into this underground cavern and laid me on one of those straw beds to recover. That's the whole story of how I came to be in his power."

"Well, Tess, here is the rope ladder. Will you go up first? Don't mind the darkness. You will find the opening in the tree before you. Step right out into the bushes, and I'll be with you in a moment."

While he placed his foot on the ladder to steady it she climbed up.

In a few moments he heard her call down "All right!"

Then he followed and found her standing just outside the opening.

Pushing their way through the bushes, they reached the bridle-path.

"Jesse! Oh, Jesse!" shouted Ted.

"Hilloa!" came back from his chum at some distance.

"Tell me, Ted," said Tess, grasping the boy's arm lovingly with both of hers, "how did you find that cavern, and how did you know I was down there?"

"I found it by accident and I did not know you were down there. It was this that caused me to hunt around here for some evidence of your presence," and he took from his pocket the locket he had found in the grass and handed it to her.

"My locket!" she cried. "I had not missed it."

She opened it and kissed his picture.

"I'd rather you'd kiss me than my picture," he said.

"Would you?" she asked with a coquettish glance.

Then she threw her arms around his neck and once more their lips met.

And it was a long kiss, too, for Jesse hove in sight as they separated.

"Hurrah!" shouted Dane when he caught sight of Tess.

"You've got her, have you?"

"Looks like it, doesn't it?" replied Ted.

"Where in creation have you been, Tess?" asked Jesse.

"You'd never guess," replied Ted. "She's been a prisoner in an underground cavern."

"A prisoner in an underground cavern!"

"Exactly. And who do you suppose was keeping her there?"

"How should I know?"

"Then I'll tell you. It was Tug Ralston."

"You don't mean it!" almost gasped Jesse. "Do you mean to say that Ralston is in this neighborhood?"

"I do. I knocked him out with the butt end of my revolver a few minutes ago."

"Well, I don't see how he managed to keep clear of the sheriff."

"You would if you'd seen the snug hiding-place he's got."

"Where is it?"

"Do you see that big, thick oak tree yonder?"

Jesse nodded.

"The trunk is hollow."

"The dickens it is!"

"The roots are also hollow. In fact, a deep hole leads right down to a cavern under the ground. The sheriff evidently doesn't know of the existence of the place. It is furnished with a good-sized table, benches, and a dozen straw couches covered with blankets. It looks like the roosting place of a gang of bandits."

"There are no bandits in this neighborhood."

"No; but I heard there were some years ago when the Lookout mine first started."

"You say you knocked Ralston out?"

"I did."

"And he's down in that cavern?"

"Yes—securely bound hand and foot, waiting for the sheriff to take charge of him."

"I'm glad that I see his finish in sight. He's wicked enough to get a life sentence."

"If he gets five years I think it will be the most that'll happen to him," replied Ted.

While they were talking the party had started to walk back to the Cooke home, Tess holding on to Ted as if she considered him her private property.

Soon after striking the creek road they saw a small party of horsemen approaching them at a brisk trot.

It consisted of old man Cooke and his friends starting out for a more extended search of the country.

The prospector was riding a bit in advance and he immediately spotted his daughter and the boys.

With a shout he spurred on his animal, and alighting close to the young people, he grabbed his child in his arms with tears of joy and relief running down his bronzed cheeks.

"Tess, Tess, where have you been since yesterday? What happened to you?" he asked after pressing her to his breast and kissing her several times.

"Dear old dad; did you miss me so much?" she replied with a fond caress.

"Tell me where you have been," he repeated tremulously.

"I've been a prisoner in an underground cave."

"A prisoner in an underground cave!" he ejaculated.

"Yes, and I'd have been there yet, and probably for some

time only for Ted Brown. He found me and rescued me from the rascal who had captured me."

"Who is the rascal who treated you this way, and where is he? If we catch him we'll hang him to the nearest tree."

"No, you mustn't hang him, dad, though he deserves it. You must turn him over to the sheriff. He's been looking for him for a week. It's Tug Ralston."

"Tug Ralston!" gritted the old man. "He shall suffer for this outrage. Where is he?"

"Ted will show you. He made a prisoner of him. You must thank Ted, dad, for saving me."

The old prospector grabbed Ted by the hands and thanked him with gratitude in his heart.

"Now," he said, "lead us to where this scoundrel is. We'll settle with him in mighty short order," added the old man grimly.

"I will on condition that you promise not to make it a hanging bee," replied Ted. "I can't be a party to turning that fellow off in such a way, bad as he is. You must agree to turn him over to the sheriff."

The prospector didn't want to agree to any such thing.

In his younger days he had been used to lynch law for offenses far less serious in his opinion than this attack on his daughter.

The very idea of that rascal depriving his daughter of her liberty even for an hour was beyond pardon in his estimation.

The other men, more cool-headed and less interested, backed Ted up.

They declared that as long as Tug Ralston had not actually harmed Tess Cooke, they could not go to extremes with him.

With everybody opposed to his summary plan, the prospector reluctantly agreed to hand Ralston over to the authorities.

He took Ted up behind him on his horse, and while Tess and Jesse walked on to her home, the mounted party, guided by Ted, proceeded to the hollow tree in the wood.

CHAPTER XI.

TED STARTS FOR HOME.

Less than an hour later the mounted party rode up to the Cooke home.

They had Tug Ralston, who had regained his senses, strapped on the back of one of the horses.

He looked like the hard case he was—dirty, unshaven and sullen.

Ted dismounted and rejoined Tess, while the rest of the party, after finishing the contents of the old man's whisky jug, started for Carson with their prisoner.

The young people entertained one another until Pop Cooke returned.

Ted and Jesse helped the girl prepare dinner, which was all ready by the time the prospector got back with a glow of satisfaction on his rugged countenance.

During the meal Tess told her story to her father, and then Ted told him how he had discovered the entrance to the secret retreat underground.

"It's a whole lot of satisfaction to me to know that the rascal is under lock and key at last, with the pretty certain prospect of spending a good many moons in the State prison," said Ted.

"I'm so glad," said Tess. "I was always afraid that he would harm you, Ted."

"And I'm glad, too," put in Jesse. "I was always nervous about Ted myself."

Late that night, after the boys had gone home, the sheriff and his posse drew up before the Cooke home and the officer rapped on the door.

The prospector was aroused and looked out of the window.

"Hello, John," he said. "I've got Tess back."

"Glad to hear it," answered the sheriff. "Where is she?"

The old man told him all the particulars, winding up with the statement that he'd find Tug Ralston safe in the calaboose at Carson.

"That's good," replied the officer. "That young chap did you and Tess a good turn, and me one as well. He deserves the thanks of the county."

The posse rode away and the prospector went back to bed.

Next morning Ralston was brought before the Carson magistrate for examination.

Tess and Ted were on hand to give their evidence.

Ralston had nothing to advance in his own defense, so he was held for trial at the county seat.

The sheriff lost no time in taking him to the county jail, where he was provided with a cell till his day of trial.

Before that event came off old man Cooke had thoroughly prospected Ted's property and told him that the facts warranted his proceeding at once with the formation of a company to take over the ground and begin mining operations on an up-to-date principle.

So Ted decided to start for home to have a talk with his mother and set the ball rolling.

The nearest town on the railroad to Carson was Truxton, fifty miles distant, and Ted had to go there on horseback to catch a train East.

Tess hated to part with him, even for a few weeks, but she realized that she had to do it.

"You won't forget me, will you, Ted?" she said tearfully, the night before he was to begin his journey. "You won't let any other girl come between us? Promise me."

"Of course I'll promise you," he said, kissing her. "Just as if any other girl stood the ghost of a show alongside of you."

"I should want to die if anything happened to take you away from me," she said.

"Oh, nothing is going to happen to do that," he answered. "You're the only girl I ever had, anyway."

"Am I?"

"Yes, you are."

"I'm so glad of that. I think I'd shoot any girl that tried to come between us. I'd shoot her and then kill myself."

"Don't talk nonsense, Tess. Are you going to be jealous of every girl that looks at me?"

"No-o; but I want you all myself."

"Well, you've got me all yourself."

"Not when you're away from me—hundreds of miles away."

"Can't you trust me?"

"Yes, of course; but——"

"But what?"

"I'm not like other girls. I've seen pictures of them in the magazines that dad takes. They dress in fine clothes, and they look prettier than me."

"Don't you believe that they're prettier than you. I think you're the loveliest girl in all the world."

"Do you honestly believe that, Ted?" she asked, nestling closer to him.

"Bet your life I do. Just wait till I'm president of my copper mining company, and we're married one of these days, I'll get you clothes that will make your head swim. Your father says that I'm bound to make a million or more out of the mine in time. A million is a whole lot of money. The interest on it alone would give a man a good income. Well, that million will be as much yours as mine. If I belong to you, my money will, too."

"I don't care anything about your money. I'm satisfied to have you."

"Even if I was only a boy copper miner?" laughed Ted.

"Yes. I wouldn't care what you were."

"You'll think different one of these days. Wait till you come to live in a fine house, and dress like a lady, then you'll understand the value of money."

"Maybe so; but I wouldn't lose you for all the money and dresses in the world."

"I'm glad to hear it. By holding on to me you'll get the money and dresses, too, and the fine house, and servants to boss around."

"Oh, dear, I don't know what I should do with servants. I've always kept house for dad myself."

"Well, don't worry about the servant problem till you're up against it. I'm going to write you two or three times a week, and you must answer at least half my letters."

"I'll answer them all."

"So much the better. I'll be on the lookout for them."

Ted promised to ride out in the morning to bid her a final good-by, and then he took his leave.

Jesse got leave of absence from the mine to see his chum off on his road East.

Ted met him at the mine after his last parting from Tess, and they rode together as far as the town of Dunkirk, nine miles from Carson.

There the boys shook hands and separated, and Ted continued on his way alone.

His course took him through the mountains, but the road

was a good one all the way to Truxton, and was the route taken by the teams carting the copper ore to the railroad.

Ted calculated on reaching Sedgwick, a small town, about dark.

He intended to stop there for the night.

His animal, however, stepped into a hole and wrenched his foot, and the boy had to lead him a mile, till he came to a brook, where he bathed the limb and gave him a rest.

The horse, however, limped a good bit after that, so that Ted had to favor him all he could lest he break down altogether.

The consequence was that darkness caught him many miles west of Sedgwick.

Furthermore, the sky had grown overcast and every moment looked more threatening.

"This is kind of hard luck," he said to himself. "Looks as if I'm in for a wetting. I don't know how far Sedgwick is from here, but I judge that it's quite a distance. It's liable to take me three or four hours to reach it at this rate. If I saw a house anywhere in sight, I'd apply for supper and a night's lodging for myself and beast. A good night's rest ought to bring the animal around all right. But this seems to be a particularly lonesome stretch. Not a solitary light in sight. Oh, I'm wrong. There's a light now, but it must be a good half mile away, and a bit off the road. I'll have to make for it. I hope it's from a farmhouse, though I haven't seen the sign of a farm for the last three hours. It's too mountainous about here, I guess, for a farm to be productive."

Ted pushed on, keeping the light in sight.

He was not riding, but leading the horse, as the animal went better that way.

The light continued to shine clear and distinct through the night, and Ted found no difficulty in keeping it in view.

That it came from some house, whose outlines the boy was not yet able to make out, was almost certain, and Ted welcomed any old shelter with pleasure, for the rain had begun falling in a kind of drizzle which promised to become heavier presently, while the wind was rising and southing through the many trees in the vicinity.

At length Ted came to a half-opened gate leading into a short lane.

He took the liberty of entering it with his horse.

The fencing and general aspect of the place, as well as he could make out in the dark, did not impress him with the worldly importance of the person or persons who lived there.

"I don't believe I'll find much of an accommodation here," he mused; "but any kind of a roof is better than no shelter at all on such a night as this. It's going to rain pretty hard before a great while, and if I were obliged to push on to Sedgwick I should resemble a drowned rat by the time I got there. Who would have thought when I left Carson this morning that I should run into such conditions as these? It looked then as if it wasn't going to rain for a month. However, that wouldn't have made any difference with me if my horse hadn't met with that accident. We should both be snugly housed in Sedgwick by this time. Well, a fellow must take things as they come in this world and say nothing."

The light vanished as Ted continued on up the lane, but a dark blot upon the gloomy landscape indicated the position of the house he had been counting on.

The lane ended at a tumble-down gate, and pushing this open on its rusty hinges, boy and horse found themselves in a yard overgrown with weeds and other kinds of rank vegetation.

Had it been lighter Ted would have seen a weather-beaten two-story building that showed every evidence of neglect and comparative poverty.

In the darkness and rain, however, most of its shortcomings were temporarily concealed from the young visitor, who was not curiously enough disposed to examine the house with a critical eye.

Ted walked up to a door in a single-story addition at the rear, where he saw a light and which was evidently the kitchen, for a stovepipe rose through the roof, and knocked loudly.

CHAPTER XII.

A STARTLING ENCOUNTER.

Ted had to knock a second time before any notice was taken to his presence.

Then the light disappeared from the window, the door

was unbarred and opened on a chain, and the outlines of a gaunt-looking woman of middle age, with a lamp in her hand, appeared in the narrow space.

"Who are you and what do you want?" she inquired in a tone that did not speak well for a hospitable reception.

"I am a boy, and I want shelter from the rain. I am on my way to Sedgwick."

"Why don't you go on to Sedgwick, then?"

"I'm afraid it's too far."

"It ain't more'n seven miles by the road."

"My horse has broken down, and as it's raining harder every moment, I'd rather stay here a while if you'll let me. If you'll give me a bed and something to eat, with shelter and some hay for my animal, I'll pay you well."

"What will you pay?" asked the woman, her eyes lighting up greedily at the word.

"I'll give you a dollar if you think that's fair," replied Ted.

"A dollar!" exclaimed the woman.

"Yes, a dollar."

"I haven't any accommodations for strangers in the house," she answered, after a pause, during which she eyed the boy closely under the gleam of the lamp. "Besides, my husband wouldn't stand for you bein' here, nohow. I expect him home any moment, maybe drunk, and he'd break my bones if he caught sight of you. Still, I want that dollar mighty bad. I don't see money very often, and a dollar would be a windfall to me. If you wouldn't mind puttin' up with the hay in the loft of the barn—you could put your horse in one of the vacant stalls—and some meat and bread with a jug of milk, and will pay me a dollar for it, you kin stop; but I can't do no better."

"All right," replied Ted, who was glad to make any kind of an arrangement that offered shelter from the inclemency of the weather. "The barn will do, all right."

"It ain't much of a place," said the woman, in an apologetic tone, "but it'll keep off the wind and rain. You'll find plenty of hay for a bed in the loft, and you kin give your hoss as much of it as he kin eat. You'll find a bucket somewhere on the ground floor. You kin fill it with water from the trough in the yard. I'll let you have a lantern if you'll promise to be careful with it, and fetch it back as soon as you've fixed your hoss. Then you kin give me the dollar, and I'll give you the food and the jug of milk."

Ted told her that was satisfactory, so she got the lantern, lit it and handed it to him.

"You'll find the barn yonder," she said, waving her hand in the direction.

"Thank you, ma'am, I'll find it."

He found the building easily enough, and it was truly a dilapidated structure.

Ted wondered if it really would keep the rain out.

The door was held shut by a leather strap attached to a button.

The boy walked in first and looked around the ground floor.

He saw two stalls, in one of which was a fodder rack.

A rickety buggy stood at one side, held together by ropes, each of the wheels leaning in a different direction.

Pieces of harness hung about, but there was no sign of a horse.

Various farming implements, much the worse for use, lay around in disorder.

Ted went up the flight of stairs he saw in the corner and examined the loft.

There was a pile of hay there that would make a soft enough bed; a covered oblong box, which might or might not have been empty, and various odds and ends connected with farming.

Ted pitched as much hay down as he thought would satisfy the appetite of his animal, descended, put it in the rack, and then led the animal into the stall.

The horse attacked the hay, and while he was thus employed Ted hunted up the bucket and filled it at the trough.

After the animal had ate his fill the boy watered him, and then returned to the house with the lantern.

The woman had the food waiting for him, and after handing her the dollar bill, which she clutched as though it were a yellowback, he took the plate of meat and buttered bread, and the jug of milk, and retired to the barn to make way with it.

He shut the barn door, but could not fasten it on the inside.

Carrying the jug and the plate up to the loft, he sat down on the floor in the dark and disposed of the meat and bread and milk with a good appetite.

The rain, which had stopped after his conversation with the woman, now came down in earnest, while the wind piped up and whistled through the crannies of the barn.

"Geel! But I'm glad I'm under cover. It's a beastly night to be out in. The rain doesn't seem to come in through the roof, that's one satisfaction. As for the wind, I don't mind that, for the weather is warm. If it was winter, I'd have to burrow under the hay to avoid being frozen. Well, I'll turn in now, hoping that there may be a change for the better by morning, so that I can go on to Sedgwick."

Ted threw himself upon the pile of hay, and was presently lulled to repose by the wind and rain.

A couple of hours passed, and then there was a noise outside.

Two men were crossing the yard toward the barn.

Both were of powerful physique, and hard-looking chaps.

The one who led the way carried a lantern in his hand, and it was the same lantern Ted had used to attend on his horse.

The rain had stopped to some extent, but the flashing light showed that it was still coming down in a heavy drizzle.

The men were pretty well soaked, but neither seemed to mind it much.

The man with the lantern opened the barn door and walked in, followed by his companion.

As neither glanced in the direction of the stalls, the horse escaped their attention.

"Look out that you don't stumble over that there plow, Tug," said the man who appeared to be the owner of the barn.

"I'll look out, don't you fear," replied his companion, none other than Tug Ralston, who had escaped, with a couple of other prisoners, from the county jail early that morning. "You think this place will be safe for me to lie low in for a while?"

"It will be safe enough for to-night, I guess. In the mornin' I'll take you to a place in the woods where you'll be all right as long as you choose to stay there."

"I reckon I struck luck when I met you, Higgins," said Ralston as he followed the man up the stairs to the loft. "It must be nigh on to two years since we was pals."

"It's all of that, Tug, and I'm right glad to meet you again."

"You're doin' me a good turn, Higgins, and I shan't forget it."

"I never go back on an old friend if I can help it."

The two men were now in the loft, and Higgins flashed his lantern carelessly around.

The light revealed to him the outlines of the sleeping boy on the hay.

"What in thunder have we here?" he ejaculated with an imprecation.

He stepped quickly over to the spot and turned the lantern full upon Ted, who was sleeping with his head buried in the hay.

"A boy," he said. "I wonder if he came in here on his own hook or whether my missus gave him permission to sleep here?"

"Is she that soft-hearted?" asked Ralston with a sour look.

"Not to my knowledge she isn't. I'll have to rout him out or it won't be safe for you to stay here."

"If you rout him out he'll see me, anyway."

"Not if you hide yourself while I'm doin' it."

"Where will I hide?"

"Get into that corner."

Ralston did so.

Then Higgins grabbed Ted by the arm and pulled him into a sitting posture.

"What are you doin' here, young feller?" he asked he boy in a fierce tone.

Ted looked at him in sleepy bewilderment.

"What's the matter?" he asked.

"I asked you what brought you here?" demanded Higgins crustily.

"Are you the man who owns this place?"

"Yes, I'm the man who owns this place. You ain't got no right here, so just skip."

"Won't you let me stay till morning?"

"No, I won't. I won't have you 'round here."

"I came here to get out of the rain, and I paid——"

Ted stopped as it suddenly occurred to him that the woman of the house might not want this man, who was probably her husband, to know that she had received a dollar for food and the poor accommodation of the loft.

"What's that? You paid what?"

"Nothing," replied the boy, who would rather lose the benefit of his money than get the woman in trouble. "I was bound for Sedgwick. My horse sprained one of his forelegs and couldn't carry me. Then it got dark and came on to rain. So I put in here to rest the horse and keep dry."

"Where's your hoss?"

"Downstairs in one of the stalls."

"I didn't see him. Well, you'd better take him and go. You can reach Sedgwick in an hour, hossback."

"I'm afraid the horse won't bear me, so I'll have to walk."

"I don't care what you do as long as you get a move on."

"I'll give you half a dollar if you'll let me stay till morning."

"No, you won't give me nothin'. Just make yourself scarce, d'ye understand?"

Ted realized that further argument was useless, and he got up from his straw bed.

Higgins raised his lantern and flashed it in his face.

As the boy's features were plainly illuminated, Tug Ralston uttered an exclamation of surprise and anger.

Ted turned and looked in the direction of the sound.

Ralston dashed forth from his place of concealment and grabbed the boy by the back of the neck.

"I've got you again, have I? Well, I reckon I'll fix you for keeps now, blast you!"

He drew a revolver from his pocket, cocked it and pressed it against Ted's head.

CHAPTER XIII.

HOW HIGGINGS SAVES TED'S LIFE AND THE BOY RETURNS THE FAVOR.

"Hold on, Tug!" exclaimed Higgins. "What in thunder are you up to?"

He knocked up his companion's arm just as the rascal pulled the trigger.

There was a flash, a stunning report that staggered Ted, and the bullet went into the roof of the barn.

"Are you mad, Tug Ralston?" roared Higgins, grabbing the revolver and wrenching it from his companion's hand.

"What in creation did you try to shoot this boy for?"

"'Cause I hate him!" replied Ralston vindictively.

"You hate him!" cried Higgins in surprise.

"Yes, I hate him. Give me the gun so I can finish him."

"Do you mean to say that you know this boy?"

"Yes, I know him, and I'll never rest till he's planted."

"What have you got against him?"

"That's my business. I had him twice dead to rights, but each time he got away. He shan't get away now if I have to strangle him."

He spoke with compressed fury and made a grab for Ted. Higgins, however, interfered.

"Stop!" he said in a determined voice. "I won't stand for no murder business on my premises. Do you s'pose I want to have a noose put 'round my neck on your account?"

"Then leave the boy with me and get back to your house. You needn't know what happens after you're gone."

"I tell you I won't have nothin' like that 'round here," replied Higgins firmly, thrusting the revolver into his pocket.

"Well, if you don't like bloodshed I can wring his neck just as well as not. I don't care how I fix him as long as I do it," said Ralston sullenly.

"No, you let the boy alone."

"I thought you was a friend of mine," growled Tug.

"I'm doin' you a friendly turn in savin' you from the gallows."

"I ain't worryin' about the gallows."

"You'd get there pretty quick if you killed this boy."

"How do you know I would? I'm willin' to take the chances to get square with him."

"What the dickens has he done to you that you're so dead set against him?"

"He's done enough."

"It's my opinion that you're a bit off your block."

"I don't care what your opinion is. I'm goin' to settle things with this boy whether you like it or not."

"I say you're not. Skip along, young fellow, while you've got the chance."

Ted, seeing his opportunity, moved toward the ladder.

With a howl of rage Tug started for him, but Higgins interposed his bulky form between.

In a moment the two men grappled.

Both were of about equal strength and physique, and they swayed to and fro about the loft.

As Ted had no interest in their encounter, though he felt grateful to Higgins for saving his life, he rushed downstairs, unhitched his horse and led him out into the night.

The rain had ceased, but there was no sign that the weather was clearing up.

As Ted passed through the barn door he heard a crash up in the loft, and saw a flash of light through the small, sashless opening.

He hastened to lead his limping animal away, and had got as far as the gate of the lane when, looking back, he saw the loft was on fire.

"Well, it's nothing to me," he muttered, leading his horse into the lane. "Still, I wouldn't like to see any harm come to that man who saved me from having my brains blown out. I'll wait here a few moments."

The words were hardly out of his mouth before he saw one of the men dash out through the door and run towards the woods.

"That must be Ralston. The man who owned the place would not run away like that."

He watched to see Higgins appear, but he didn't, and the fire was increasing fast.

"I shouldn't wonder if Ralston knocked him senseless and then left him behind to burn up. He's coward and cur enough to do just such a thing. I'm going back to help the man myself. I owe him a good turn, and will pay it if I can."

Ted, after hastily tying his horse to a big spreading tree, ran back to the barn, which was blazing away at a great rate.

The smoke was pouring out of the window, which was outlined against the glare of the flames, and was rising through the interstices of the shingle roof.

Very little was coming through the doorway, and through that entrance Ted rushed.

It looked like a risky matter to venture up the ladder to the loft, but the boy, feeling that a life was at stake, was not deterred by the danger.

He bounded up two steps at a time and thrust his head into the thick smoke that filled the upper story.

Almost within his reach lay the unconscious form of the owner of the place, stretched at full length.

Ted stepped up and grabbed him by the head and shoulders.

He was a heavy weight to move, especially under the circumstances.

At that moment he heard the screams of the woman of the house, who had just discovered that the barn was on fire.

Whether she had any knowledge that her husband had gone to the building with the stranger he had brought with him, or whether she was merely concerned about the safety of the boy she had sent there to sleep, certain it is she ran toward the barn in great excitement.

She reached the door just in time to see Ted dragging her insensible husband down the stairs as he might a bag of goods.

With a shriek the woman rushed forward to help him.

As she caught her husband in her sinewy arms the boy staggered against the plow and fell over it.

Then the floodgates of heaven opened of a sudden and a heavy downpour of rain descended upon the landscape.

Under this deluge the fire began to hiss and splutter where it had broken through the roof.

Through it all the woman bore her husband to the house, and, unmindful of the boy who had really saved him, started to bring him to his senses.

This was not a difficult job, and he was soon on his feet, looking out the door at the barn where the fire was making little headway in the pouring rain.

The woman hurriedly told him how the boy, to whom she now admitted having given permission to stay all night in the loft, had pulled him downstairs from the burning loft, but she had not seen him since.

"He probably went off in the rain," she concluded.

"He needn't have done that now," growled the man. "As he did me a good turn, I'd have let him stay in the kitchen for the rest of the night."

Seeing that while the rain continued there was a chance to save the lower part of his barn, at any rate, Higgins left the house and ran over to the building.

As he picked up the bucket that Ted had used to water

his horse, he saw the boy getting up from the plow on which he had been lying, knocked out.

"Hey!" cried Higgins. "You here yet? Run to the house and ask the old woman to give you a tin pail. I want you to help me put out the fire."

Ted got the pail and he and Higgins worked vigorously for the next fifteen minutes carrying water from the trough up to the loft and throwing it upon the burning hay and smoldering wood.

At the end of that time the flames had been entirely subdued.

Now that the need of further exertion was over, Higgins turned to Ted, and said:

"My old woman says you saved my life when I was unconscious in the burnin' loft above. Well, I'm obliged to you. If I can ever do as much for you I'll do it."

"You've already done as much for me. You saved me from having my brains blown out by Tug."

"That's so. I forgot about it. In fact, you were the cause of the racket between us, which ended by his laying me out as stiff as a poker. He's got a fist that has as much power in it as a mule's hind legs."

While they were talking the rain eased up again to a smart drizzle, but that made little difference to them, as they were as wet as though they had been in the nearby river.

"Where did you leave your hoss?" asked Higgins.

"Under a big tree in the lane."

"You'd better go and bring him back. You can stay in the house for the rest of the night. The old woman shall make you a shakedown in the kitchen, and build a good fire to dry your clothes and mine."

"I'm much obliged to you."

"You're welcome. By the way, what is this grudge that Tug had against you?"

Ted told him about the incident in the mine which had led to Ralston's animosity.

"So he's been workin' in the Lookout mine, has he? I never knew that before. Well, I didn't think he was such a tough chap as he seems to be. He and me used to be pals once, about two years ago. Then he disappeared all of a sudden and I didn't see him again till to-night, when he came into the saloon at the Corners and asked for a drink. He seemed kind of nervous like, and when I went up and slapped him on the shoulder he jumped as though he had been shot, and put his hand to his hip pocket where he carried his gun. When he recognized me he called me outside and asked me to hide him up here, as he said he had broken jail that mornin'. I was willin' to do him a favor for old time's sake, so I fetched him on here. I was goin' to let him sleep in the loft, not supposin' it was occupied by somebody else. I would have let you stayed only I wanted you out on his account. If he hadn't jumped on you the way he did there wouldn't have been all this trouble, and you'd have been on your way to Sedgwick."

Ted brought his horse back to the barn, gave him a rubbing down, with the help of Higgins, and then accompanied the man to the house, where a bed was prepared for him on the kitchen floor, and his clothes with Higgin's were hung to dry before a roaring fire.

CHAPTER XIV.

A FIENDISH SCHEME OF RALSTON'S.

Next morning he was awakened by hearing the woman moving around the kitchen.

She was preparing breakfast.

When she saw that he was awake, she pointed to his clothes, which were on a chair, and said she'd go out while he dressed himself.

It didn't take Ted more than five minutes to get into his garments.

"There's a bucket of water, a towel and some soap outside," the woman said.

Ted accordingly went out into the yard and made his toilet as best he could.

By that time breakfast was ready, and he was invited by Higgins to sit down and eat with them, which he was glad to do.

When the meal was concluded he announced his intention of resuming his journey.

He bade good-by to the man and his wife and started off, his horse seeming to have recovered from his lameness.

He had covered perhaps one mile when a man jumped out from the cover of some bushes and confronted him.

Ted had no difficulty in recognizing him as Tug Ralston.

The fellow grabbed the bridle of his horse and then seized the boy by the arm.

"I s'pose you thought you wouldn't see me again," said Ralston grimly; "but I ain't so easily shook off. I'm sorry that I ain't got no weapon with me, but I reckon I can fix you without one."

Ted was unarmed, having left his revolver with Jesse.

He had not the slightest idea of meeting Ralston when he left Carson, as he supposed the rascal was securely housed in the county jail.

Therefore he was placed at a great disadvantage in the presence of the husky scoundrel.

Ralston yanked him off his saddle, and held him while he bound his wrists behind his back.

"Now walk ahead of me or I'll smash your head in with a stone."

Ted, much against his inclination, felt obliged to comply with the fellow's orders.

"It's a wonder you wouldn't let up on a fellow after all the trouble you've given me," he said.

"I'll never let up on you till I've finished you," replied Ralston savagely.

Tug, leading the horse by the bridle, marched the boy ahead of him, up a path away from the road and into the mountains.

The rascal had nothing to say, and Ted was in no mood for conversation.

It was a fine sunshiny morning after the rain, and nature seemed to be in a chipper mood, as far as she could be in such a desolate region.

Ted wondered where his enemy was taking him, but he knew that it was useless for him to question the man on the subject.

After a walk that lasted perhaps an hour, they came to a swift mountain stream.

The banks were rocky and without verdure of any kind. Here Ralston stopped and tied the horse to a nearby tree.

"Sit down!" he roared at Ted.

The boy did so, for he judged the order would have been followed by a blow from the rascal's sledge-hammer fist had he refused to obey.

Tug paid no further attention to him, but went nosing around among the boulders as if in search of something.

Whatever it was the rascal was after, he did not find it, and he looked disappointed.

Finally he took out his pipe, filled it with tobacco, lit it and began to smoke, regarding the boy with a malignant look.

"I s'pose you're achin' to know what I'm goin' to do with you," he said at length.

"I can imagine that it isn't anything good," replied Ted wearily.

"You'll find out by and by, when the sun gets a bit hotter," snarled Ralston with an expression of sinister satisfaction.

"Look here, Ralston, can't I buy you off for a good sum of money?" asked the boy after a pause. "I'll also agree not to appear against you in court."

"I'll guarantee you won't appear against me in court, if I ever get there, whether it suits you or not," he replied significantly. "As to buyin' me off, you ain't got money enough to do that."

"I'll have plenty of money in a short time if you let me go."

"Where are you goin' to get it?"

"Out of the copper mine on my property."

"On your property?" sneered Ralston.

"Yes. That is my property where you came across Jesse Dane and me that Sunday you first tried to shoot me."

"Your property, eh? Did you think you can stuff me with such a story as that?"

"I'm telling you the truth," replied Ted earnestly.

"If that's your property, and there's a copper mine on it, why were you workin' like a nigger with the rest of us in the Lookout? Answer me that."

"I didn't know that there was copper on my land till recently. I worked in the Lookout mine to get a general knowledge of copper so that I could prospect my property and see if there was copper on it."

"That was the reason, eh?" said Ralston incredulously.

"Yes."

"And you expect me to believe that tommyrot?" jeered the rascal.

"I haven't any reason for telling you what isn't so."

"Yes, you have. You want to try and hoodwink me into lettin' you off. But it won't work, not for a red cent," and the ruffian laughed sardonically.

"That isn't so. I want to convince you that I'm worth a lot of money, and that I'm able to pay you a good price for lettin' up on me."

"How much do you want to pay me?"

"I'll give you the first \$1,000 I'll get hold of."

"If I knew you had the money in good coin or notes at this moment I might talk business, but as you haven't I'm not goin' to take any chances."

"You won't be taking any chances. I'll give you my word that I'll pay you inside of six months."

"Your word ain't worth nothin' to me. You'd swear to any lie in order to give me the slip."

"If you take my life it won't benefit you the least bit," persisted Ted in desperate earnestness; "but you could get a whole lot of satisfaction out of \$10,000."

"I know I could if I had it; but as I haven't, I'll take a whole lot of satisfaction out of doin' you up."

"And you want to kill me just because I gave you one smack in the eye down in the mine that evening."

"I don't allow nobody to get the best of me if I can help it. It wasn't the blow you gave me alone. You made me tumble out of the cage, and I came within an ace of passin' in my checks."

"That was your own fault."

"That's a lie! It was yours," replied Ralston savagely.

"Well, even if it was, you wasn't hurt much. You were around Carson drinking that night."

"That's because I was lucky. I swore then I'd have your life, and I'm goin' to have it, so you might as well close your trap. All you can say won't alter my intentions a bit."

Ted looked at his relentless face and felt discouraged.

The rascal had brought him there to kill him and could not be turned from his purpose.

Just why he was delaying the commission of his crime Ted could not understand, but he wasn't kept long in ignorance.

Ralston could have knocked his brains out with a stone and pitched his body in the stream, but he made no such attempt.

He had hit on a more malignant mode of accomplishing his object—a mode that could have occurred only to such a hardened ruffian.

Ralston cut off part of the hitching-rope attached to the horse.

With this he now proceeded to bind Ted's ankles together.

Then he pushed the boy back on the flat stone just above the water on which he had been seated.

"Lie there," he said with an evil grin. "You'll have company presently. Then you'll understand how you've got to die. I shan't have to spill your blood this time. In fact, there won't be no blood lettin' at all. The inhabitants of these rocks will take the job off my hands."

"What do you mean?" asked Ted, not understanding what was in store for him.

"What do I mean?" replied Ralston with a fiendish grin.

"I mean that I can count five rattlers comin' out of their holes at this moment. They've been waitin' for the sun to warm things up, and now they're comin' out to look around. They're not very lively yet, but I mean to stir them up. When they get their mad up and look around to see who's the cause of it they'll see you. Then the moment they get within strikin' distance of you they'll wait for you to make the first move, and when you do there'll be somethin' doin' quicker'n a flash of lightnin'. A rattler can strike so quick it would make your head swim to follow the movement. The moment the poison is in you it'll work through your veins so fast that a whole drug-store couldn't save you if it was standin' yonder. How do you like the prospect?"

It is scarcely necessary to say that Ted didn't like it.

CHAPTER XV.

RALSTON GETS IT IN THE NECK.

As Tug Ralston spoke he gathered up a handful of small stones and began casting them at the slowly-moving reptiles.

The rattlesnakes, the most deadly species of the wilderness, began to take notice.

Whir-r-r!

The warning rattle of one of the snakes sounded sharp and distinct above the swishing waters of the stream.

The rascal threw more stones at them.

Whir-r-r! Whir-r-r!

The rattlers were throwing off their torpidity.

They began coiling up, ready to dart their heads, or even their entire sinuous folds, at the enemy they scented somewhere about.

Tug laughed discordantly as he noticed the effect he had produced among them.

"They will soon have you, Ted Brown," he gritted. "Lie still there! Don't you dare get up or I'll make a target of your head, too."

Whir-r-r!

One of the snakes sprang his rattle seemingly so close to Ted that the lad, with a cry of fear, turned over to roll as far away as possible.

The snake was not quite within striking distance of the spot where the boy lay, but it saw him move and rapidly uncoiled to glide nearer.

"Stop!" roared Ralston, springing forward, for he saw that another move would precipitate Ted into the stream and rob him of the special entertainment he had counted on.

As the boy made the move in his terror of the rattlesnake, Tug reached for and grabbed him just as he was falling.

To brace himself he grasped the edge of the rock nearest the snake.

In a moment the snake stopped, coiled itself and arched its glittering head.

Its keen, beady eyes were centered on Ralston's hand.

"You thought to escape the snakes, did you?" gritted the man. "Rather drown, eh? Well, I don't blame you, but I was to quick for you that time. Come back here and take your medicine. I wouldn't miss seein' you squirm among them snakes for a mint. What a circus it will—"

The sentence ended in a hoarse cry.

Just as he pulled Ted back on the stone he raised his fingers from the rock.

That movement was what the rattler had been waiting for.

With the quickness of light its head shot forward and its fangs were buried deep in Ralston's hand.

The man let go of Ted and turned around with the cry on his lips.

He saw the rattler and realized that he had fallen into the pit he had dug for the boy.

His face went ashen white with terror and despair.

Another rattler was close upon him, too.

While he was engaged with Ted they had singled him out as their enemy and came toward him.

The whir-r-r sounded and the fangs of the second snake were buried in the fleshy part of his thigh.

His unearthly scream startled Ted into a sitting posture.

The exertion of the act loosened the cord that bound his wrists so much that one of his hands came out and both were then free.

The proximity of four of the rattlers caused Ted to get his jackknife out of his pocket in a twinkling and cut the rope that bound his ankles.

Then he sprang on the rock and looked around to see how he could best evade the snakes.

Their attention was all turned on Ralston, who had fallen and was writhing on the ground.

Ted gazed in a fascinated way at the doomed rascal.

He saw two snakes strike him simultaneously—one in the cheek and the other in the neck.

One minute later the scoundrel stiffened out and lay still, quite dead, his heart paralyzed by the quantity of deadly poison that had been injected into his veins.

He had met the very fate he had designed for his victim, and the horror of it was such that Ted never forgot that scene as long as he lived.

As soon as the boy recovered his faculties he made haste to leave the vicinity.

The man who had made so many attempts to kill him was now a corpse—a corpse that even the mountain vultures and coyotes would shun.

In an hour his body would be black and bloated—an object of repulsion.

The old adage that the mills of the gods grind slowly but exceedingly fine was demonstrated in his fate.

He had been allowed to go his limit and had compassed his own death.

Ted untied his horse from the tree and started back, as near as he could guess, for the road leading to Sedgwick.

It took him two hours to reach it, and another hour to cover the distance to the town.

As soon as he got there he inquired for the deputy sheriff. He learned that he was away with a small posse trying to round Tug Ralston up.

Then the boy told the constable how Ralston had met his death.

The news was immediately telegraphed to Truxton, the county-seat.

Ted registered at a hotel for dinner, and after the meal started for Truxton at a smart gait.

He arrived there too late to connect with the afternoon train, so he put up at the nearest hotel to the railroad station, and put in his time that evening writing a long letter to Tess Cooke, in which he detailed all his thrilling experiences since leaving Carson.

Next morning he took the east-bound train, and in due time arrived at Petersville and was welcomed with open arms by his happy mother.

At her suggestion they both called on Judge Harper, a retired lawyer living in the village, who was a sort of friend of the family, and Ted laid the project of forming a company to mine the copper before him.

Ted showed him the specimens, and the written report of old man Cooke.

The evidence produced by the boy was sufficient to cause him to take a lively interest in the matter.

He communicated with an expert mining man in Truxton, requesting him to go to the Brown property, and to call on Mr. Cooke for full details.

The result was a report so perfectly satisfactory that Judge Harper no longer had any doubts as to the advisability of helping Ted form a company for getting the ore on the market.

The Brown property was turned over to the company, and Ted was elected president.

CHAPTER XVI.

TESS COOKE SHOWS THE STUFF SHE'S MADE OF.

"Say, Ted," said Jesse one morning, walking into the office of the Montana mine in one of the buildings on the property, "matters have come to a focus at last at the Lookout."

"What do you mean?" asked the young president of the Montana Company.

"There's a strike on at the Lookout."

"A strike!" ejaculated Ted.

"Yes. For higher wages and shorter hours. You know this thing has been on the hooks for some time."

Committees had waited on the superintendents of both mines requesting that the change the men wanted be made.

The mining companies were not in favor of granting the demands of their workers, and through their superintendents had given them to understand that fact.

A secret meeting had been held by the committee working in the men's interests on the preceding Sunday.

The committee first waited on the superintendent of the Lookout.

The spokesman delivered the men's ultimatum, giving the official forty-eight hours to communicate with the officers of the company at Truxton.

Then the committee called at the Montana mine.

Ted met the delegation.

The spokesman asked for old man Cooke and was told that the superintendent had gone to Truxton and would not be back for three days.

The men decided to wait till Cooke returned.

On the morning with which this chapter opens, the forty-eight hours allowed the Lookout people expired, and the committee called on the superintendent of the mine for their answer.

The superintendent told the men that the president of the company being away at New York, nothing could be done until he returned.

This answer was not considered satisfactory.

The order was immediately given to strike, and every worker in the mine quit at once.

Jesse Dane was talking to the Lookout's superintendent when this happened, and he hastened back to tell Ted.

"Then we may look for trouble here," said the young president.

At that moment Tess Cooke appeared in the doorway.

"May I come in?" she asked smilingly.

"Sure thing. Why not?" asked Ted.

As soon as the girl entered the office Jesse said he had some business outside to attend to.

Fifteen minutes later he came rushing back in a state of great excitement.

"Ted," he cried, "a committee of Lookout strikers is outside. They have been down in the mine and about a third of our men have been induced to quit work."

"That so?" replied Ted. "That isn't a square deal. I must look into this."

A crowd of demonstrative men was gathered near the mouth of the main shaft.

"What's the meaning of this?" demanded Ted, walking up to the men.

"It means that we've quit until your company gives us what we want—more pay and less hours," replied a big chap in sulky defiance.

"Your committee said nothing to me whatever."

"Oh, you're only a boy. You don't count," replied the fellow sneeringly.

"I guess you'll find that I count some," replied Ted resolutely. "I order you all to go back to work and then submit the matter to Mr. Cooke when he gets back from Truxton."

"D'ye hear that, fellers?" roared the man. "Are we goin' to put up with his sass?"

"No, no!" cried the others angrily, surrounding the boy. "Tumble him into the cage and send him down into the mine."

"We'll do better than that," shouted the ringleader. "We'll give him a free ride to the river in this here car. Seize him, some of you. Hand me that rope yonder and we'll tie him in so that he can't get out."

In spite of his resistance Ted Brown was lifted into the car and tied there.

The steel ore car in which the boy was speedily secured by the wrists to each end of the rope passed down under the center of the vehicle, ran on rails that reached from the mouth of the shaft down a long, though not very steep incline, to a small dock on the creek, or river, as some called it.

As the car emerged from the crowd with its living burden, Jesse Dane sprang forward to his chum's aid.

As he laid his arm on the steel car to stay its progress he was seized by a couple of the miners and hurled back several yards.

Ted, however, had another defender—one who was prepared to give her life if need be to save him, but not before she had made things exceedingly sultry for the crowd about the car.

That defender was Tess Cooke.

Bounding forward like a fawn, she placed herself, drawn revolver in hand, right before the moving car.

"Stop!" she cried imperiously. "Stop that car or I'll shoot, and if I miss one of you out of six you can tie me in the car, too."

With an imprecation the leader started forward, put both hands on the car, and was about to give it a powerful shove that would have sent it against the girl and thence over the brink on to the incline, when Tess fired.

The fellow uttered a terrible cry, put his hand to his chest and swung half around.

Then he dropped like a stone.

"Back, all of you!" cried Tess, darting up to the car, menacing the crowd with her smoking weapon. "Back, I say!"

The mob of miners stampeded in a moment.

Jesse, knife in hand, sprang into the car and cut Ted loose.

"I hope you didn't kill Gleason, Tess," said Ted as he bent over the unconscious ringleader.

"No, I didn't shoot to kill, but to give those men a lesson."

Gleason was dangerously, but not fatally hurt, and he recovered in time, but he never saw Tess Cooke after that, but he kept her at a distance.

Accompanied by Tess and Jesse, Ted tackled the miners and got them to listen to reason.

The result was they returned to work again.

The strike went on at the Lookout, and a company of State militia was sent to protect the company's property. Eventually a compromise was agreed on similar to the one at the Montana mine.

Two years later Ted married Tess Cooke, took up his residence in Truxton, and his duties as president of the company.

Next week's issue will contain "TIPS OFF THE TAPE; OR, THE BOY WHO STARTLED WALL STREET."

CURRENT NEWS

The Navy Department announces that the total enlisted strength of the Navy on March 23, 1917, was 61,089 men; gained in March, 2,058; gained since act of last year's authorized increase, 6,873. This increase is due to the "standardization of recruiting methods, especially the system of districting the country." The shortage of officers is placed at 995.

One-half of Vida, Ala., has gone to war and two-thirds of the remainder is preparing to enlist. Vida is a peaceful little town near Montgomery. A recruiting officer of the regular army arrived and found thirteen young men of military age. Six joined and came to Montgomery with the recruiting officer, leaving behind four others who promised to join them when their private affairs could be arranged.

Willifred A. Wetherbee, State agent, who codified the flag laws of Massachusetts, made public on Mar. 15 in Boston a recommendation that worn-out American flags, whether publicly or privately owned, be burned, with due reverence and some ceremony. He said that Federal and State laws forbidding misuse of the flag, made no provision for its disposal when frayed, but that navy and coast guard regulations decreed its burning.

In the belief that Herbert Reeves, former counsel of the Model Building and Loan Association, will repay a substantial amount of the money he stole from the association stockholders have appointed a committee of nine to deal with him and his counsel. Reeves, who pleaded guilty to grand larceny, is in jail in Brooklyn, N. Y. The association was wrecked by the losses he caused. District Attorney Martin of The Bronx heads the committee. Several indictments against Reeves and John S. Hanson, president of the association, have been returned in that county. The losses amount to \$96,000, and Reeves has asked for two months to make the amount good.

The Department of Botanical Research of the Carnegie Institution has been making studies on the recession phenomena of the Salton Sea continuously since 1906. About half of the original depth of 84 feet has now been lost by the excess of evaporation and seepage over inflow and underflow, while the yearly rate of fall has been reduced from over 50 inches to less than 40. During the winter of 1915-16, the loss was less than the amount received from rains and the overflow or irrigation systems, so that the lake instead of steadily falling has now an oscillating level. The original volume of water amounted to three or four cubic miles, and its re-

duction by about one-half has been accompanied by a concentration of dissolved salts from about 0.33 per cent. to 1.6 per cent.

It is a badge of patriotism in Hungary nowadays to wear a coat with the side pocket on the right hand side, revealing that the garment has been turned so as to make it presentable, thus saving the labor and expense of a new suit. In fashionable restaurants and hotels one sees many prominent people thus attired. Nobody, not even a war millionaire, can afford many new suits nowadays, and the tailors are reluctant to make clothes even at their own price, which is now about \$50, cash in advance, for a suit which would have cost about \$20 in peace time. The tailor generally tries to dissuade a would-be customer from ordering a new suit, at the same time offering to turn his old suit and make it look like new for \$10 or \$15.

The Du Pont Powder Company issued the following statement regarding the ability to supply military powder to the government from its Wilmington, Del., offices on March 25: "The Du Pont Company is in a position to meet any demands that the government may make for military explosives. Its capacity is such that it believes it can take care of both of its present foreign contracts and any United States government requirements. It is now installing at its various plants, and will have ready for operation about May 1, additional capacity of 95,000 pounds of smokeless powder a day. The difference between the capacity needed to meet foreign contract requirements and the full capacity will probably satisfy the government; in any event the home needs will be given every consideration."

The President on April 24 signed the War Bond bill authorizing the sale of \$5,000,000,000 in Government bonds and \$2,000,000,000 in treasury certificates, the larger sum intended as financial aid to the allies of the United States in the war against the Central Powers. Treasury certificates to the value of \$200,000,000 were offered for subscription at three per cent. on April 21, and were oversubscribed by nearly the same amount within twenty-four hours. An additional \$50,000,000 was authorized on April 24 and was immediately taken. Further issues will be made from time to time and the Secretary of the Treasury announced that remittances in the way of aid to our allies may be made as soon as the necessary arrangements are completed. The money already raised will be used to meet current Government expenses and to pay for part of the tremendous orders and supplies that have been placed.

OUT FOR EVERYTHING

OR

THE BOY WHO TOOK CHANCES

By GASTON GARNE

(A SERIAL STORY.)

CHAPTER III (Continued).

"Thank heaven!" muttered the man, standing up. "Find out what's wrong if you can."

Down on his knees went Chug, inwardly praying that the job would not be beyond him.

"Acting as your own chauffeur?" asked Ned, while his chum investigated.

"Yes, for to-day," answered the owner, a pleasant-looking, middle-aged man. "I have had three drivers in a month. They are a rascally crew. Two of them stole and the last man drank."

"That's because you didn't have a genius at the work like my friend," nodded Ned.

"What's that?" wondered Chug, cocking up his ears.

"Your friend a chauffeur?" asked the owner.

"One of the best in the land!" Ned declared, enthusiastically.

"Licensed?"

"Licensed!" sniffed Ned. "He wouldn't bother with a license. That's for amateurs who aren't sure of themselves."

"Could your friend be induced to change?" asked the owner.

"He isn't doing anything in that line just now," Ned went on. "He meant to take a week's rest and then take up with some new employer."

"Why, you young men don't either of you look to be over seventeen," broke in the owner's wife, pleasantly.

"We are, though, both of us," Ned replied, lifting his hat.

Which was the truth, since both had passed their seventeenth birthday.

"That's all that was out of order," said Chug, rising, rather red-faced, for Ned had been laying it on strongly. "Now the machine will run all right, I guess. Shall I run it down the road a little way for you, sir?"

"If you will," assented the owner, quickly. "Both of you climb in in front."

Chug's eyes were glowing. He was in his element, for his eyes had told him that this was a fine machine. Though not by any means a chauffeur, Chug knew enough anyway to be able to start, stop and steer the machine.

So, with a loud and triumphant honk-honk from the horn Chug started.

The big car ran along perfectly.

"Want speed, sir?" Bailey called back.

"Quite a little," the owner replied.

On that little-traveled road Chug let her out for thirty miles an hour. It was glorious sport.

They ran through a village, Chug slowing the car down nicely until they had left the village behind. Then again he let out the speed.

And now at thirty-five miles an hour they raced along, Chug thrilling with the mastery of the huge, magnificent machine.

And then things happened with a startling suddenness.

Rounding a bend, they came close to a railroad track.

The noise of their own machinery had drowned out the rattle of an express train that was whizzing down to the crossing at a rate of a mile a minute.

It seemed certain that express and auto must meet at the very crossing.

Chug tried valiantly and like lightning to obey.

"Reverse!" shouted the owner.

But like a flash Ned Warren leaned over, struck Ned's wrist sharply, then crowded the speed lever forward.

Whiz-z! They struck the track, with the huge locomotive fairly at their elbows.

It seemed like an eternity, that fraction of a second.

Then they were past the track, whirling down the road.

But the locomotive had passed within six feet of the rear of the car.

"Gracious!" shouted the owner. "Why on earth didn't you reverse?"

"Tried to," Chug called back, "but my friend was smarter and crowded on speed."

"Why did you do that?" gasped the owner.

"My motto," replied Ned, turning and looking back, "is always to take chances. If we had reversed, we couldn't have stopped. Either the engine would have struck us, or we'd have crashed into the train."

"I guess you're right," admitted the owner, his voice trembling. "But whew! It was a fearful chance to take!"

CHAPTER IV.

JUMPING INTO TROUBLE.

"I've seen enough of you young men to know that you're a remarkable pair."

So declared the auto's owner, Mr. John Craddock.

The ride had terminated at the Craddock home, a handsome country mansion in the middle of some thirty acres of grounds.

Mrs. Craddock had fainted at the moment of crossing the track in front of the locomotive, but she had been revived without much trouble.

Their home was some ten miles beyond the scene of what had come so close to being a fatal accident.

"Would you like a trial as chauffeur?" Mr. Craddock went on, looking at Chug.

Would he? There wasn't anything else on earth that Bailey wanted half as much.

"The pay is thirty dollars a week and keep," went on Mr. Craddock.

Thirty dollars a week! Chug knew that men who drove good cars got that much, but the figure almost made his head swim just the same.

"Why, I think I'll try it, sir," Chug answered coolly.

"Then take the car around to the garage at the rear of the house," ordered Mr. Craddock. "Your friend will stop here with you to-night, I hope. Your room will be comfortable for two."

"Thank you, sir," Ned acknowledged.

"Say!" quivered Chug, as he drove the machine slowly around behind the house. "Isn't this great? But how about you? We would have to part, Ned, if I took this job."

"We'd have to, anyway, wherever you got a job. Take it, Chug, until something better turns up."

"Well, I'll think it over," replied Chug. "I can change my mind in the morning if I want to."

A man came to open the garage for them. Chug ran the machine in, took care of it, and then the man took them to the house.

Mrs. Craddock was waiting to see them.

"My housekeeper tells me that the chauffeur's room needs cleaning before it's fit for you to go into," announced Mrs. Craddock. "So for to-night you shall have a room in the main house. James will show you up now. Your meals will be sent to the room."

Which was a polite way of showing the youngsters that they were not to be treated as guests.

A chauffeur will not usually eat at the servants' table; neither is he invited to the owner's table. So a chauffeur's meals are usually sent to his own room.

"Lest you think that I am foolish in taking strangers in without reference," smiled Mr. Craddock, "let me say that I consider myself a pretty good judge of faces. I am certain that you are both to be trusted in my home."

The supper, when it reached the room to which

they had been assigned, proved to be all that could be wanted.

"People know how to live here," commented Chug, as he and Ned ate. "Say, this is a little different from our cooking, ain't it? And thirty a week as a chauffeur—for me! Think of it!"

"Keep cool," urged Ned. "You ought to be looking for something better by the time you've learned enough to really know an automobile."

"But what are you going to do, Ned? I feel like a sneak to fall into a job and leave you in the cold."

"Don't worry about me," retorted our hero, blithely. "I shall hustle into something, and it'll have to be something good for me to take it."

Their long tramp that day had tired them. Both boys were ready for bed at an early hour. Nor were they long in dropping asleep in the big, soft bed in that elegant guest-room.

But Ned awoke with a start some time in the night.

He had a sense that something was wrong before he opened his eyes.

And surely enough there was.

In the very little light that the stars sent into the room he saw a masked man at Chug's side of the bed.

Almost instantly the fellow turned and stole noiselessly to the window. Bending out, he made some kind of a gesture with one hand, then turned and stole back into the hallway.

"Gracious! What does that mean?" palpitated startled Ned. "But get a grip on yourself, boy! Take a chance on finding out what it means."

Though his legs trembled under him, Ned slipped out of the bed, making softly toward the window.

As he passed a chair on which his trousers lay Warren stopped to pull them on.

Then, barefooted, and with nothing on above the waist but his undershirt, Ned gained the open window.

He glanced down, then shook.

For beside one of the dining-room windows, right underneath, he saw clearly two masked men standing.

While one was looking cautiously around the grounds, the other stood looking in at the window.

Each had a revolver in his right hand.

"Burglars!" quivered Ned.

As Ned peered, he saw a heavily-loaded sack passed out through the open window.

"The family plate!" muttered Warren.

Then he heard a whisper from inside the dining-room.

"What's that?" whispered one of the men in front of the window.

In the awful stillness of the night Ned could hear the answering whisper:

"The plate's good enough plunder——"

"I should say it was!"

"But I got into the missus's room——"

(To be continued.)

ITEMS OF INTEREST

HIGHEST DWELLING HOUSE IN THE WORLD.

"The loftiest habitation in the world is in Peru," writes Isaiah Bowman in *The Andes of Southern Peru*, published by the American Geographical Society. "Between Antabamba and Cotahuasi occur the highest passes in the Maritime Cordillera. We crossed at 17,400 feet and 300 feet lower is the last outpost of the Indian shepherds. The snowline, very steeply canted away from the sun, is between 17,700 and 17,600 feet. At frequent intervals during the three months of winter snowfalls during the night and terrific hailstorms in the late afternoon drive both shepherds and flocks to the shelter of leeward slopes or steep canyon walls. At our six camps, between 16,000 and 17,200 feet in September 1911, the minimum temperature ranged from 4 degrees to 20 degrees F.

"The thatched stone hut that we passed at 17,100 feet and that enjoys the distinction of being the highest in the world was in other respects the same as the thousands of others in the same region. It sheltered a family of five. As we passed three rosy-cheeked children almost as fat as the sheep about them were sitting on the ground in a corner of the corral playing with balls of wool. Hundreds of alpacas and sheep grazed on the hill slopes and valley floor, and their tracks showed plainly that they were frequently driven up to the snowline in those valleys where a trickle of water supported a band of pasture. Less than a hundred feet below them were other flocks and huts.

SEARCHLIGHTS GUIDE PLOWS.

Tractors on Long Island farms are now equipped with searchlights and the plowing carried on long into the dark hours. General Director A. A. Johnson, of the Food Reserve Battalion says:

"We are going to get all this good land in condition for planting if we have to send a man ahead of the tractors with a lantern at night. This plowing is not being done by horses that must rest at night, and we intend therefore, to make each tractor do the work of two by working at night."

But lanterns will not have to be resorted to. The tractors will be equipped with acetylene tanks and automobile lamps. Young men now studying agriculture here—city boys for the most part—are being rapidly instructed as tractor operators so that no unexpected shortage in labor will hinder this branch of the battalion's work.

Owners of large private estates on Long Island are coming to the front every day with assurances that they will utilize for planting every tillable acre they possess.

The Lord estate at Cedarhurst offers 400 acres for cultivation. The battalion would rather have

some private individual assume this task, but if none is willing the machinery of the battalion will operate the farm, from plowing to harvesting time.

E. D. Morgan, of Wheatley Hills intends to put 100 acres of virgin soil under cultivation, planting it with potatoes. That means about 15,000 bushels in the fall that would not otherwise have been dug.

A MONSTER ALASKAN VOLCANO.

Katmai, the tremendous volcano on Shelikoff Strait in Alaska, has at once gained new fame for itself and upset the general rule among volcanoes. An investigator for the American Geographic Society, who has succeeded in reaching the crater, pronounces the vent of the fire mountain one of the largest in the world.

Katmai was already famous for one of the greatest and most violent eruptions of historic times, the explosive outburst of June, 1912, which buried the country for 250 miles around under several feet of debris, absolutely shut out the sun from a great part of Alaska for the whole summer, and sent such an enormous quantity of fine ash high into the atmosphere that some of it settled in Northern Africa.

Now, the scientist, Robert F. Griggs, who has just reached Radiak from the first visit to the mountains, says that the resulting crater is miles across and thousands of feet deep, with a sputtering lake at the bottom.

These two facts in conjunction are wholly unusual in modern volcanic history, according to the *San Francisco Chronicle*. All the other known violent volcanoes have small craters. Concentration has been supposed to have accounted for much of the violence of their outbursts. Mount Pelee had a crater only 2,500 feet in diameter; the Soufriere of St. Vincent and Vesuvius have small craters. That of Krakatoa on the Sunda Straits, which had in 1883 the only other recent eruption comparable in magnitude to that of Katmai, was only a moderate crater.

The great craters, like those of the Hawaiian volcanoes, are ordinarily only simmering cauldrons. The largest of them all, Haleakala, on the Island of Maui, with a bowl twenty miles in circumference, has never, so far as is known, shown symptoms of violence.

So Katmai seems to have the unique distinction of the most violent and at the same time one of the largest craters in the world. Unfortunately, the report of Griggs' investigation does not tell just how large the crater is. But we do know that no other crater can be described as "thousands of feet deep."

So the sight of the vent of Katmai, "miles across and thousands of feet deep, with a blue-green lake simmering and sputtering on the floor," must be one of the most stupendous spectacles of the world.

BEN AND THE BANKER'S SON

—OR—

THE TROUBLES OF A RICH BOY'S DOUBLE

By ED KING

(A SERIAL STORY)

CHAPTER VII (continued)

"It may be so."

"Your wound is now healed. I saw it last night while you slept. It is a very fair imitation of the birthmark."

"That's all right; but there is another objection which you don't seem to take any account of."

"There you make a big mistake. I take account of every objection. To what do you refer?"

"Where is my memory of the past?"

"Pshaw, my dear boy! The easiest of all things to get around. I saw your father-to-be only yesterday. I explained to him that my system of cure had been such that your memory of the past was practically obliterated, and I charged him above all things to permit no attempt to be made to revive it, otherwise you were certain to return to your former erratic ways."

Ben was silent.

"This man thinks of everything," he said to himself. "But just wait till I see the banker. He shall know all."

"And so you see," continued Doctor O'Grady, "you have nothing to worry about on that score. You will recognize your father and your sister. You will do well to show them affection, but beyond that you need not go. If any attempt is made to question you as to the past complain of a violent pain in the back of the head, and they will let you alone."

"All right."

"You are in dead earnest now?"

"Sure I am; but where do you expect to come in on this?"

"I told you before. I shall render a bill of \$5,000, and I shall collect it, too. Then when your respected uncle croaks I expect from you two millions. There will be no crowding. I shall give you time to turn yourself, but I want the dough when the time comes, and if you play me false look out for trouble; it will surely come."

Ben listened with growing excitement.

"You speak of Mr. Benjamin Leslie as my uncle," he said. "What do you know?"

"All."

"Explain. Is he actually my uncle?"

"He most certainly is. I have gone to both trouble and expense to look up his family history. He had

a brother Thomas, who was cast off by your grandfather for marrying an actress named Pearl Podmore."

"Good heavens, doctor, that was my mother's maiden name."

"Exactly. You do not remember her?"

"No."

"And no wonder. She only lived with your father three years. When you were two years old she deserted him and went back on the stage. He then settled in Fuddebackville, Pa., and opened a country store. Later he took to farming. Failure seemed to follow him, and he died in poverty about a year ago."

"It is all true. Is my mother then alive?"

"I even went to the trouble of finding that out. She is not. She died in San Francisco several years ago."

Ben was silent a long time now, and Doctor O'Grady let him think.

"Why not?" he kept saying to himself. "If I am really the banker's nephew, why should I not be a son to him, in place of this beautiful cousin of mine, who has made so much trouble? He doesn't want the job, and he don't seem to know the value of money. Why shouldn't I jump into his shoes?"

"I think I can about read your thoughts," said the doctor. "You are more than ever determined to push this thing now."

"I am if what you say is true."

"I tell you it is true. I have even been to Fuddebackville and looked you up. Oh, there is no doubt whatever that you are the nephew of old Leslie. He got your father's share of your grandfather's estate. Your father was too proud to do anything about it. By rights a big share of these millions belong to you."

And about this time Ben was beginning to think so himself.

"How much further is it?" he asked.

"We are just leaving Hastings," was the reply. "The Leslie house is on the heights back of Tarrytown. It won't be long now."

"I can't see why you drugged me. I feel like the deuce, when I ought to be as clear-headed as possible."

"Perhaps I made a mistake, but I was taking no chances of a scene. Here, I'll fix you all right."

The doctor opened a medicine case which he took from his pocket, and producing a small vial extracted a pill.

"You needn't be afraid of it," he said, as Ben drew back.

"What is it?"

"A hair of the dog that bit you—morphine."

"Was that what I had before?"

"Sure. I put it in your meat."

"I'm not going to take any more then."

"Now, kindly allow me to know something about medicine. If you will take that pill you will be all right before we get to Rio Vista, as your uncle's country seat is called; if not, I put it back in the bottle, and you can go on feeling like the deuce."

Ben took the pill.

In a few moments he felt like another boy.

Now, as is well known, the use of morphine dulls the conscience.

The professional morphine fiend simply has none. He will lie and steal without the slightest compunction.

There is no doubt that Doctor O'Grady had a double motive in drugging Ben.

Now, with this second dose in him, it seemed to the boy that there was only one thing to do, and that was to go straight ahead on the lines his tempter had laid down for him.

During the rest of the ride they continued to discuss details, and to lay plans.

The doctor suggested that Ben have very little to say at first, but as the days went on he should gradually resume his natural manner.

"I have heard from your former friends in Fuddebackville how generally popular you were," he said. "You can make yourself beloved by your father and sister here beyond a doubt. If you work your cards right in a week's time you will be so firmly installed that it will be impossible for your cousin to dislodge you even if he was to try."

"Honestly, where do you suppose he is, doctor?" asked Ben.

The doctor shrugged his shoulders.

"He may have been drowned," he said. "You know he dove into the East River from the top of my wall. I think I told you that. We heard that a boy answering his description came out of the water with his clothes on near Hallet's Cove, and was seen to take a car to Astoria ferry. This story may have been false. At all events, if he is alive you can rely upon his being somewhere in the Tenderloin with the gang of crooks he travels with."

"Or in jail."

"It is possible, but I hardly think likely. If it was that he would have been writing his father to get him out long before now. But enough of this. I think we are there now."

The driver had stopped his horses. He had stopped several times to inquire the way.

There was a bright light outside, and peering

out, Ben saw that it burned before a pretty little building covered with ivy.

"This is the lodge," said the doctor. "Here we go. Brace up now, Ben. I am depending upon you. For your own sake as well as mine there must be no slip."

The carriage turned in at a gateway, and went rolling along a smooth, level road, lined with trees and shrubbery.

In a few moments it brought up before a large mansion built of gray stone.

The front door stood wide open, revealing a brilliantly lighted hall, while at the head of the broad steps stood a young girl of considerable beauty, whom Ben instantly recognized as the same person he had met on board the steamer Wilchester months before.

As Ben followed Doctor O'Grady out of the carriage she ran down the steps, exclaiming:

"Oh, Ben! Welcome home, brother! Welcome home!"

CHAPTER VIII.

THE MIDNIGHT SUMMONS.

Their coming had been telephoned from the lodge, and now, before he fairly knew where he was at Ben Leslie found himself countenancing the doctor's fraudulent scheme.

But what could he do?

Here was a young and beautiful girl throwing her arms about his neck, kissing him, calling him brother, and welcoming him to this palatial home.

There was nothing to do then, that was certain.

"And if I can make this girl and her father happy why should I do anything?" Ben was asking himself, as Alice turned to welcome the doctor.

He determined to postpone explanations at all events.

"And now you must both have supper," declared Alice, as she led the way into the hall. After your long ride you must be hungry. Isn't it so, Ben?"

"I certainly shall not object, Miss Leslie," said the doctor. "Nor will Ben, I think."

Ben said nothing.

He had scarcely spoken. He could not trust himself to speak.

"We will go to the breakfast-room," said Alice. "I have ordered supper prepared for you. It is just ten o'clock, and that is the time you stated you would arrive, you know, doctor."

She led the way to a cozy room, where a table was already set.

Touching an electric bell she placed herself at the head of the table, after showing Ben and the doctor where they were to sit.

"And how much improved you look, brother," she exclaimed.

(To be continued.)

TIMELY TOPICS

During a heavy fall of rain a friend of mine carrying a very wet umbrella entered a hotel to pay a call to some one upstairs. After placing his umbrella where it might drip he wrote upon a piece of paper and pinned it to the umbrella: "N. B.—This umbrella belongs to a man who strikes a 250-pound blow. Back in fifteen minutes." He went upstairs, and after an absence of fifteen minutes returned to find his umbrella gone and in its place a note reading: "P. S.—Umbrella taken by a man who walks ten miles an hour—won't be back at all."

The corps of African military workers behind the lines in France is to be very largely increased this spring. By summer it is expected that the native labor army will be multiplied to many times its original size. The experiment, according to army reports, has been a brilliant success. The chief fear, when the first detachment of natives were sent to France, was the climatic conditions would prove an obstacle, particularly the rigor of the European winter. The mortality last winter, however, was very low and the disease that was most dreaded, pneumonia, hardly existed among them.

The Government of Peru has offered a prize of \$500 for the best textbook teaching temperance for use in the public schools of the country. Intemperance has become a serious problem in the republic, especially in the mining regions, and it is hoped that the introduction of the teaching of temperance in the schools will have salutary effects. The texts submitted, which must be in the Spanish language, will be passed upon by a jury composed of the Director of Public Instruction, the Director of the Normal School for Men, a member of the Temperance Society, and one teacher from the Lima public schools.

The Portland *Oregonian* states that the Secretary of the Navy will send to Congress during the present session another report from the commission on the establishment of additional navy yards, recommending the establishment of a submarine and aviation base on the Columbia River near Astoria, Ore., and will recommend an appropriation of \$300,000 to acquire a site and prepare the same. This authority states that the commission, in this report, will emphasize the necessity for adequate naval defenses at the mouth of the Columbia River and will favor the acquisition of a site on Cathlamet Bay.

There are, naturally, many fresh water springs on the bottom of the ocean. Some of those on the coast of France have recently been described by a French writer, who states that certain springs near the

shore of the Mediterranean, issuing at a depth of 150 feet, send fresh water to the surface, where fishermen are in the habit of filling their water barrels with it. The island of Moharek of the Bahrein group, in the Persian Gulf, depends upon a submarine spring for its water supply. Divers plunge into the ocean with goatskin bags, which they fill with fresh water and carry to the surface, where the water is poured into casks.

An agreement was reached on April 25 between the Navy Department and representatives of oil producing companies whereby the Navy will be supplied with an "adequate and uninterrupted store of gasoline and other petroleum products at a reasonable cost." The arrangement is along the same lines as that reached with copper and steel producers recently and is regarded by Naval officers as of no less importance than either of the first two. Paymr. Gen. Samuel McGowan, U. S. N., represented the Secretary at the conferences. The oil companies were represented by a committee of seven headed by A. C. Bedford, president of the Standard Oil Company of New Jersey.

The following true story of a retriever dog seems to show that animals are able instinctively to be of much help to one another. A well-trained retriever dog, named Nero, owned by a boy and girl, was in the habit of being taken almost daily for a walk through some fields beside a river. One day in the Christmas holidays, notes the Christian Science Monitor, he was as usual, accompanying his young master and mistress, when, to their surprise, he suddenly dashed off among a flock of rooks feeding in the field. All the birds flew away, with the exception of one, which seemed unable to fly properly, and presently the dog caught it, and, bringing it to the children, laid it at their feet. They picked up the rook, and found it was none the worse for being carried by Nero, so they decided to put it up on the branch of a tree by the river. The rook seemed quite pleased and happy on its perch, and there it was left. The next day the children returned and saw a solitary rook on the ground. Off went Nero, and this time the rook made little attempt to escape from him. The bird was put in his usual place in the tree, and for three mornings this performance was repeated, each time the rook allowing itself to be caught quite easily. After that, though, rooks were often seen. Nero made no attempt to chase them, and when the boy and girl made them fly on purpose, there was not one left on the ground. They therefore soon came to the conclusion that Nero's protegee was now able to fly, so that his work in that direction was finished.

Good Current News Articles

Crazed by the loss of their seven sons, the last one of whom was killed on the western front recently, Frank Riegelmann, an aged stonemason of Kempton, Germany, and his wife have ended their lives. Their bodies were discovered in a deep hole of a mountain stream.

Seven of the twenty-five 14-inch rifles recently ordered by the Secretary of the Navy have already been forged by the Bethlehem Steel Company. This company also has an order for twenty-five 16-inch guns, but the smaller type will be rushed to completion as they are intended for the battleships of the Pennsylvania class, now approaching the stage where armament may soon be installed. Work has been started on other orders for similar weapons.

The annual report of the Bethlehem Steel Company for 1916, which was issued recently, showed net profits amounting to \$61,717,309, which were more than six and one-half times greater than in 1914, and more than seven and one-half times larger than the net in 1915. Compared with 1915, a year in which war orders helped the Bethlehem's income account, last year showed a total more than two and one-half times larger. The corporation had a balance of \$43,595,968 available for dividends, compared with \$17,762,812 the year before and \$5,122,703 in 1913. The corporation's working funds were increased to approximately \$100,000,000. The average number of employees last year was 74,013, compared with 22,064 the year before. Wages and salaries last year amounted to \$51,499,733, against \$21,800,664 in 1915.

Peanuts are not indigenous to China, having been introduced some time previous to the eighteenth century. They are now grown in all parts of the country, except the higher regions. Chinese peanuts are said to average 40 per cent. oil. The oil

is abstracted and exported in large quantities for use in cooking, as a substitute for olive oil, and largely in the manufacture of soap. The value of peanut oil exported in 1915 exceeded by more than 50 per cent. the value of all peanuts shipped. After the extraction of the oil the product remaining is formed into cakes, which are used as fodder, poultry feed or fertilizer. A large part of the peanuts exported to Europe is used in the manufacture of oil and soap. The greater part of the peanuts of China used commercially come from the provinces of Shantung, Honan and Chihli. Shantung peanuts are ordinarily larger in size, while those from Honan and Chihli are said to be somewhat richer in oil and consequently usually bring better prices.

Ascum—He's got a good job, hasn't he? He tells me he's working for the government now. Newitt—Huh! The next time he tells you that just substract "for" from it.

"Dear," said the melancholy wife, "if you die first you will wait for me there on that far shore, won't you?" "I guess so," replied her husband wearily. "I've always had to wait for you everywhere I go."

Husband—What makes you yell so through the phone? Do you think the machine is deaf? Wife—No; but I want that woman in the next flat to know that I have a box of American Beauty roses. She was out when they came.

STEALING A LOCOMOTIVE.

By Alexander Armstrong

My name is Peek. I own this house and grounds. I paid five thousand dollars for the estate. I made the money in one night. I will tell you how it was.

I was an engineer on the G. & P. Road. I ran the night express. I used to stop at Tigerville at 1.27 in the morning for water. It was a large town, and the road ran through the very heart of it. Opposite the water-station was the Tigerville Bank.

Gayle, who fired for me, had been suffering, as he said, during half the run down for a piece of tobacco, and had gone over to the postmaster's store to obtain one. The tank of the engine was full. I had thrown up the pipe, taken my place, and was ready to start the engine. While I was looking for Gayle I discovered three men running with all their might toward me. I had no doubt the fireman was one of them, though it was so dark I could not make him out in the gloom.

One of the men ran to the rear of the tender and I supposed he intended to get into the baggage-car. The other two came directly to the cab of the engine. One of these had a traveling-bag, and I concluded that he was a friend of Gayle, who desired to ride with him to the next station on the machine. But I was soon made to understand that all my suppositions were wrong. The two men leaped into the cab, and before I suspected anything they dragged me from my chair, stuffed a handkerchief into my mouth, and strapped my hands behind me.

"All right, Bool, start the machine. I can hold this man," said the man who held me.

"All clear," added a man, whose voice came from the rear of the tender.

As my arms were strapped behind me, I could do nothing. I had no doubt the man that held me was armed, and it was not prudent for me to make a fight, even if I had been in condition to do so. I was thrown back on the coal in the tender, while the fellow in charge of me sat on a stool and held me by the collar of my coat.

"Where is the fireman?" asked Bool, whom I could distinctly see at the throttle by the light of the "bug."

"He is not here; the engineer was the only man on the machine," replied the fellow that held me. "Let her drive, Bool."

"Have you the bag?" asked Bool, who seemed to be in no hurry to start the engine. "We mustn't go without that, Saywood."

"The bag is all right, Bool. Go ahead, or we shall all come to grief," replied Saywood impatiently.

As he spoke he pulled the traveling-bag toward him. By this time I realized that Bool was nervous in regard to the handling of the machine.

He pulled out the throttle, but he pulled it out

too far, and the engine started with a jump and a jerk.

"Stop her, Bool!" cried Saywood. "Bragg has tumbled off the tender."

The third villain had seated himself on the rear of the tender, after unshackling it from the train, and the violent jerk given by the sudden start had thrown him to the ground. I saw Bool shove in the throttle; but the engine had reached the down grade from Tigerville to Manly, and it would not stop. Saywood left me and climbed to the rear end of the tender; but he could not see his companion in the darkness.

"Why don't you stop her?" he demanded with an oath.

"I have shut off the steam, but she won't stop," answered Bool, whose tones indicated that he was sorely tried by the situation.

"Engineer, how do you stop her?" asked Saywood, coming to me again and pulling the handkerchief out of my mouth.

"Throw over the reverse lever," I answered, willing to assist in ending this exciting trip.

"Throw over the reverse lever, Bool," repeated Saywood.

"I don't know how to do it!" exclaimed my substitute in the cab. "I have got enough of this sort of thing."

"Put on the brake," I suggested.

Saywood went to the brake on the tender, and after he had studied the thing for a time he succeeded in applying it and bringing the machine to a stand.

"Now run her back," said he, highly excited.

"I can't do it! I don't know how!" pleaded Bool.

"Bragg may have been hurt; and we don't want to leave him there. The beaks will have him."

"I can start the thing ahead, and that's all I can do," added Bool. "It won't do to run back, either; we are sure to be taken if we do."

After a little argument, Saywood assented, and it was decided to go ahead again. This time Bool made a better start, letting on only a little steam. The machine went along very well under this more moderate treatment. But it had on a full head of steam, which was screaming as it escaped through the open safety valve. This noise troubled Bool; it seemed to indicate to him that something was wrong, when just the reverse was true. Saywood asked me about it, and I told him it was all right. As the fire got low, the noise ceased.

After the gag was removed from my mouth, I felt more at ease; and I began to consider the situation. I had no difficulty in coming to a conclusion in regard to the character of the men who had stolen the locomotive. Two months before several suspicious individuals had been seen observing the surroundings of the Tigerville Bank. They had been seen by the officers, and a watch had been kept over the building for a month. As no attempt was made to rob the bank, this precaution was no longer kept up,

But the job had now been done; the traveling-bag at my side contained the bonds and money stolen from the bank; and the amateur engineer and his companions were the robbers. All the pluck I had came back to me as I thought over the matter. We had run about ten miles and reached an up-grade; the engine was getting out of steam, and Saywood was directed by Bool to throw more coal into the furnace. I answered the questions he put to me, for I did not care to have the machine ruined by the villains.

While Saywood was thus engaged, I strained my arms by degrees, in order to ascertain the strength of the strap that bound me. To my great surprise and joy, it snapped under the strain I applied to it. I was free; but I made no movement to inform my captors of the fact. I had hardly accomplished this partial deliverance before Saywood seated himself on the stool at my side. I was afraid he would examine into my situation, and I asked him whether the pumps of the engine were working properly. I told him the boiler would burst if the water in it got too low.

He was alarmed, and asked Bool about the matter. I explained the gauge cocks to him, and he went to the cab to look into the condition of the boiler. When he returned I assured him we were coming to a steep grade, and that he had not steam enough to carry the engine up the ascent. I told him and Bool what to do till they had a good head of steam on, and I thought it was time something was done.

"If you will help us out we will make you a handsome present before we leave," said Saywood as he seated himself on the stool.

"I will help you out," I replied. "But you haven't steam enough. We stuff the furnace as full of wood as we can."

He rose to put in more wood. As he did so I freed my arms from the strap. He picked up some sticks of wood and turned to put them under the boiler. At that instant I sprang upon him. He was a tall man, though rather slender built. I seized him in a savage embrace, for I felt like a tiger. I got my left arm around his body, outside of his arms, which were thus pinioned to his frame. Passing the other arm around his legs, I lifted him up and bore him to the footboard; with a mighty effort I hurled him from the tender.

I had helped him out!

At this point the road was built on a high embankment, at the foot of which was a large pond. I had no doubt the bank-robber would roll down the steep declivity into the water. It did not seem to me that he could escape alive.

"What's the matter, Saywood?" demanded Bool; and he seemed not to be aware of what had transpired behind him, for he was perched up in the chair, and the crashing noise of the machinery had deafened him.

"Nothing is the matter," I replied; but I leaped upon him at the instant I spoke.

I dragged him from the chair, hitting him a heavy blow on the head with a monkey-wrench as he came down. He seemed to be stunned, and my victory was more easily obtained than I had anticipated. I shoved in the throttle and put on the brake, for I did not care to go any farther from the train of cars which had been left at Tigerville. I had some rope in the tender, and I spent some time in binding my prisoner to my satisfaction, for I was willing to profit by the blunder of the robbers.

The engine had come to a full stand. I looked at my watch and found it was seven minutes past two. The locomotive had gone about twelve miles under the guidance of Bool. Three miles back there was a station where I could use the telegraph, for I was afraid the train I had left might have procured a locomotive and started again. As I approached the pond where I had "helped out" Saywood, I shut off steam and put on the brake, for I was curious to ascertain his fate. I knew the very spot, for every rod of the whole line was as familiar to me as my own door-yard. I tightened the brake when the engine came to the place.

I opened the furnace door to obtain a little light; on the embankment lay the prostrate form of the bank-robber. I examined it. He was not dead, as I supposed, for the declivity where he had struck was covered with fine sand; but he was insensible. I picked him up and carried him to the tender. I tied him hand and foot with the greatest care, and then laid him on the top of the tank of the tender.

With my two prisoners I started for Tigerville. At the station I found that the train had not yet departed. In fifteen minutes more I ran my engine up to the train I had left. The bank robbery had been discovered, and the whole town was alarmed. My prisoners were conscious when I reached the water-station, and were handed over to the sheriff.

"Here are two of them. Have you caught the third?" I inquired as I showed the official my two robbers.

"We knew nothing about the matter till we got the telegram from the station where you stopped," replied the sheriff; and I told him all about Bragg.

"Do you know what they did with the money they took from the bank?" asked the president of the institution. "They got away with over a hundred thousand dollars."

"The money must be in this bag," I answered, handing it to him.

Before morning Bragg was captured in the fields near the town. He was so much injured by his fall from the tender that he was not able to go far.

In due time they were all tried, convicted, and sent to the State Prison for a long term. The bank did not lose a dollar, and the very next day the directors voted me five thousand dollars; and that was just what I made by those villains stealing a locomotive.

FACTS WORTH READING

LUXURY ON A TANKER.

A notable addition to the American merchant marine, the new tank steamship William G. Warden, arrived here recently from her builders and was placed in the New York, Mexico and South America oil carrying service. The William G. Warden is the largest tank steamer yet built by the Standard Oil Company and was named after the founder of the Atlantic Refining Company. She is 517 feet long and 68 feet beam and has a cargo capacity of 15,000 tons dead weight, or 5,000,000 gallons.

Like other vessels built by the Standard Oil Company, the Warden is finely fitted and has the most modern equipment and accommodations. She is a twin screw steamer and her 3,000 horse-power engines can propel the vessel at twelve knots under good conditions on either coal or oil fuel. In her fuel oil tanks 2,000 tons may be carried, giving a steaming radius of 10,000 miles.

Sixty officers and men make up the complement of the Warden. The living accommodations are unusually complete. There are private baths for the captain, chief engineer, doctor and purser, as well as large baths for the use of the deck hands and fire room crew. A hospital is one of the modern features of the vessel, which is equipped with a strong wireless plant.

The Warden is larger in tonnage than the Charles Pratt and the H. H. Rogers, which preceded her in construction at the Newport News Shipbuilding Company. Two additional tank steamers, fully as large as the Warden, are nearing completion. All five would make excellent naval auxiliaries.

LAUNCH OF THE U. S. S. NEW MEXICO.

The 32,000-ton battleship New Mexico was successfully launched at the New York Navy Yard, in the Borough of Brooklyn, at 9.55 a. m., on April 23, under the direction of Naval Constr. George H. Rock, U. S. N., who had charge of her construction, assisted by Naval Constrs. John A. Spilman and H. E. Rossell, U. S. N. Other departments of the yard also contributed their full share of work.

The huge vessel slid down the ways into the water in the most perfect manner. She was christened with a bottle of champagne by Miss Margaret C. De Baca, of Las Vegas, N. M., daughter of the late E. C. De Baca, a former Governor of New Mexico. Miss De Baca proved a perfect bottle thrower and the bottle when it struck the steel side of the ship, on the starboard bow, was smashed to bits and the champagne wet the sponsor as well as the ship. Miss Virginia M. Carr, of Albuquerque, N. M., quickly followed the christening act of Miss De Baca by smashing a pretty piece of Aztec Indian Pottery, in the shape of a gourd filled with water from the Rio

Grande and Pecor rivers against the side of the New Mexico. Others in the launching party with Miss De Baca were Miss Helen Kelly, of Las Vegas; Miss Irene Molinari, of Portales, and Miss Hildegard Hurley and Miss Katherine French, of Santa Fe. Rear Admiral Nathaniel R. Usher, U. S. N., received the special guests. Assistant Secretary of the Navy Franklin D. Roosevelt represented Secretary of the Navy Daniels and Senator A. A. Jones, of New Mexico, represented that State.

Just before the launch Chaplain Walter G. Isaacs, U. S. N., offered prayer and a band played suitable airs before and after the launching. Just after the New Mexico was water borne, Assistant Secretary Roosevelt made a short speech, praising all those who took part in the building of the New Mexico; from the highest officers down to the mechanics and helpers. He thanked them in the name of Secretary Daniels for their fine work.

The most extraordinary precautions were taken to insure the safety of the ship and the yard generally. Police outside the gates kept all people away who had no passes and inside the yard bluejackets and marines were patrolling everywhere. In Wallabout Bay and out in the river Navy patrol boats kept the waters clear of craft. Tugs quickly took hold of the New Mexico after she entered the water and was borne up stream by the tide and she was towed alongside a dock where she will receive her boilers, engines, armor, guns, etc. The vessel is nearly seventy per cent. completed. She has a length between perpendiculars of 600 feet and her breadth on load water line is 97 feet 4½ inches. She had a mean draft of thirty feet, her length over all is 624 feet, and her full-load displacement is 33,000 tons. Her designed full-load draft is 31 feet and 1½ inches, and her estimated speed is to be not less than twenty-one knots. The engines of the New Mexico are to be of the electric drive type, and she will burn oil fuel. The total estimated indicated horsepower of her main engines on trial is to be 27,500. Her complement is twenty-five wardroom officers, eighteen junior officers, twelve warrant officers, forty chief petty officers, 911 bluejackets and seventy-five marines. Her batteries were designed to be twelve 14-inch guns, twenty-two 5-inch rapid fire guns, anti-aircraft guns and four 6-pounders for saluting. She is equipped with four 21-inch submarine torpedo tubes. She will have two cage masts, and one funnel. Her keel was laid Oct. 14, 1915, and the contract price of hull and machinery was limited by Congress to \$7,800,000. The total weight of her machinery is estimated at 2,275 tons. It is hoped the New Mexico may be completed by the coming fall. The keel of the battleship Tennessee will be laid in the slip just vacated by the New Mexico. Both vessels will be practically sister ships.

INTERESTING ARTICLES

GET \$3.53 AFTER YEARS.

The Spokane Chamber of Commerce Freight Rate Fund has been increased \$3.53 after a lapse of nineteen years. Gordon C. Corbaley, managing secretary, has received the following letter from D. L. Huntington, President of the Washington Water Power Company:

"In looking over some old files we have found \$3.53, which is evidently the remainder of \$10.73 advanced to me some nineteen years ago for expenses as Secretary of the Spokane Shippers' Association. It was evidently put aside and forgotten, being too small an amount to return pro rata to the subscribers. As it does not belong to me, and I do not know what else to do with it, I am sending it to the Chamber of Commerce to be added to the Freight Rate Fund, and I doubt if any one will question the propriety of so doing. I wish that the amount were large instead of small."

SWEDES MAY EAT OAT BREAD.

The Bakers' Association of Sweden presented a memorial to the State Economic Commission setting forth the difficulties of obtaining sufficient rye and wheat flour and asking the authorities to permit and to order them to use a certain proportion of oat or barley flour in bread. The bakers assert that the situation indicates with certainty that such a measure must be eventually resorted to and point out the advisability of doing it now instead of delaying until the time when the proportions of barley and oats must necessarily be greater than would be the case now.

A body of female factory workers, estimated at 5,000, marched to-day in an orderly manner through Southern and Western Stockholm to the office of the largest local milk company, where they demanded a better distribution of milk and lower prices.

Hunger demonstrations continue at various places in the kingdom. Demands are being made for more bread, an immediate commercial agreement with England, a prohibition on the exportation of all foods, lower house rents, and similar means to lessen the cost of living.

STEEPLEJANE HELPS KEEP WORK IN FAMILY

A man is the crowd who was watching the figure swinging from the top of the Merchants' Refrigerating Company's plant in Jersey City unscranned his neck for a moment and remarked sagely to his neighbor:

"Steeplejack."

The other shook his head. "Steeplejane," he answered.

"Steeple what?"

"Steeplejane. That ain't a man. It's Mrs. Doody."

And it was. With nothing between her and the crowd but her chair and 200 feet of air, Mrs. Doody, wife of a steeplejack of New York, was painting the chimney with a disregard of the danger and of certain theories regarding the proper place of woman.

When Doody found that he had more work on his hands than he could accomplish, his wife put on overalls, kissed John, jr., goodby and started in to keep the business in the family. Six days a week now she is aloft on steeple, chimney or flagpole, as much at ease as though she were in her rocking chair at home.

At 4 in the afternoon she was lowered from her perch and started home to cook supper. "I'm only doing what we all will have to do when our men go to war," she said. "All of us women will have to learn to do their work."

ENFIELD RIFLES ADOPTED BY U. S.

The War Department has made it possible to acquire rifles at the rate of nearly 950,000 a month by the expedient of adopting the Enfield rifle of the British army to supplement the Springfields in use in the United States. Within three months, if the Government wishes to use the production of all the rifle factories in the United States, it can provide nearly 3,000,000 rifles for its army.

The Department announced that it not only had adopted the Enfield rifle for the present emergency, but had under construction types of the heavy field artillery that have wrought havoc against the German lines. The American army is woefully lacking in large calibre mobile artillery. The largest at present in service is the six inch howitzer. Two types of foreign manufacture are under construction for this Government and others may be adopted later. The War Department will not disclose the number or the calibre.

It was said that the Enfield rifles are not in any sense displacing the Springfield rifles, which by American army officers have been considered superior to the British weapons. The adoption of the Enfield for the period of the emergency is because of the great facilities for manufacture, factories in this country supplying rifles to the British being able to turn out 30,000 a day. The Springfields are manufactured at the rate of only 1,500 a day.

The Enfields will be rechambered to take the American ammunition, but in other respects will remain the same. They are not liked so well in America because, according to army officers, the Springfields have a flatted trajectory, greater range and greater power. The army has about 1,000,000 rifles on hand. Of these 800,000 are Springfields and 200,000 of old style Krag.

TOKIO CARD TRICK.
You place five cards in a hat. Remove one of them and then ask your audience how many remain. Upon examination the remaining four have vanished. A very clever trick. Price 10c. by mail, postpaid, with directions.
C. BEHR, 150 W. 62d Street, New York City.

MARVELOUS MEMORY TRICK.

No. 74	No. 46	No. 34	No. 53
351909	550550	347189	291011
No. 34	No. 93	No. 25	No. 45
335729	201123	437077	459437

This amusing and interesting trick is performed with five cards containing 100 squares, which contain 100 different numbers. The performer can instantly name a series of six figures at a moment's notice by request of any spectator. The most marvelous feat of mind-reading ever invented. So easy that a child could perform the trick. Price 10c. by mail, postpaid, with directions.
H. F. LANG, 1815 Centre St., B'klyn, N. Y.

WILLARD-JOHNSON PRIZE-FIGHT PUZZLE.
Four strips of cardboard, each three inches by one and a half inches, showing Willard and Johnson in various absurd postures. The solution in the puzzle lies in so arranging the strips that they show Willard in the complete picture, the heavy-weight champion. Price, 10c. by mail, postpaid, with directions.
FRANK SMITH, 383 Lenox Ave., N. Y.

THREE-CARD MONTE.
Exceedingly mystifying. Although the ace, deuce and trey are shown plainly, it is utterly impossible for anyone to pick out the ace. Price, 10c. by mail, postpaid, with directions.
C. BEHR, 150 W. 62d St., New York City.

TWO-CARD MONTE.
This famous trick gets them all. You pick up a card and when you look at it you find you haven't got the card you thought you had. Price 10c. by mail, postpaid.
WOLFF Novelty Co., 168 W. 23d St., N. Y.

CHANGING CARD.
One card is shown. The performer passes his hand over it and changes the card from a jack of spades to a seven of hearts. The second time he blows on the card and changes it to a queen of clubs. Quite easy to perform. Price 10c. by mail, postpaid, with directions.
H. F. LANG, 1815 Centre St., Brooklyn, N. Y.

PAPEL BLANCO.
Four cards are placed in a hat. One card is removed and the balance are now shown to be changed to blank cards. The cards can be thoroughly examined. Price 10c. by mail, postpaid.
H. F. LANG, 1815 Centre St., B'klyn, N. Y.

NUT AND BOLT PUZZLE.
A very ingenious puzzle, consisting of a nut and bolt with a ring fastened on the shank, which cannot be removed unless the nut is removed. The question is how to remove the nut. Price, 15c. by mail, postpaid.
FRANK SMITH, 383 Lenox Ave., N. Y.

FLIPPING CIGARETTE BOX.
It looks like a box of Between the Acts cigarettes, but when you open it a spring sends the contents of the box flying up in the air. More fun than a circus. Price, 15c. by mail, postpaid.
WOLFF NOVELTY CO., 168 W. 23d St., N. Y.

MIKADO BLOCK PUZZLE.
Imported from Japan. This neat little puzzle consists of six strangely cut pieces of white wood unassembled. The trick is to so assemble the blocks as to form a six-point cross. Price 12c. by mail, postpaid.
H. F. LANG, 1815 Centre St., B'klyn, N. Y.

JAPANESE BANK PUZZLE.
Built up of a large number of grooved pieces of wood. Very difficult to take apart, and very difficult to put together. It can be so dissected as to make a bank of it and when reassembled would defy the most ingenious bank burglar outside of prison. Price 35c. by mail, postpaid.
FRANK SMITH, 383 Lenox Ave., N. Y.

THE TANTALIZER PUZZLE.
Consists of one horizontal and one perpendicular piece or highly polished metal bent in such a manner that when assembled it seems utterly impossible to get them apart, but by following the directions it is very easily accomplished. This one is a brain twister. Price 10c. by mail, postpaid, with directions.
C. BEHR, 150 W. 62d St., New York City.

THE QUESTION PUZZLE.
Two links in the form of question marks, fastened together at the top. The object is to disengage one link from the other. It cannot be done without the directions. Price 10c. by mail, postpaid, with directions.
WOLFF Novelty Co., 168 W. 23d St., N. Y.

DEVIL'S LOCK PUZZLE.
Without exception, this is the hardest one of all. And yet, if you have the directions you can very easily do it. It consists of a ring passed through two links on shafts. The shanks of this puzzle are always in the way. Get one and learn how to take the ring off. Price 15c. by mail, postpaid, with directions.
H. F. LANG, 1815 Centre St., B'klyn, N. Y.

THE WAR FOUNTAIN PEN.
A very handsome fountain pen case to which is attached a pocket holder neatly made of metal and highly nickel-plated. When your friend desires the use of your pen and gets it, he is very much astonished when he removes the cap by the sudden and loud noise of the explosion that occurs, and yet a little paper cap does it all. Price, 35c. by mail, postpaid.
FRANK SMITH, 383 Lenox Ave., N. Y.

THE KAZOO.
Made in the exact shape of a submarine. With this comical little instrument you can give a bride and groom one of the finest serenades they ever received. Or, if you wish to use it as a ventriloquist, you will so completely change your voice that your best friend will not recognize it. Price, 12c. by mail, postpaid.
WOLFF Novelty Co., 168 W. 23d St., N. Y.

MAGIC LINK PUZZLE.
A number of rings. The scheme is to link them together just exactly the same way magicians link their hoops. It looks dead easy. But we defy anybody to do it unless they know the secret. Price 10c. by mail, postpaid.
WOLFF Novelty Co., 168 W. 23d St., N. Y.

MEAD CYCLE COMPANY
Dept. H188 Chicago

Rider Agents Wanted

\$ 2 to \$500 EACH paid for hundreds of old Coins. Keep ALL money dated before 1895 and send Ten cents for New Illustrated Coin Value Book, size 4x7. It may mean your Fortune. **CLARKE COIN Co.,** Box 95, Le Roy, N. Y.

To the Wife of One Who Drinks

I have an important confidential message for you. It will come in a plain envelope. How to conquer the liquor habit in 3 days and make home happy. Wonderful, safe, lasting, reliable, inexpensive methods, guaranteed. Write to Edw. J. Woods, 229 L, Station E, New York, N. Y. Show this to others.

THE JOKE SPIKE.
This joke spike is an ordinary iron spike or very large nail, the same as is found in any carpenter's nail box. At the small end is a small steel needle, 1/2 inch in length, firmly set in spike. Take your friend's hat or coat and hang it on the wall by driving (with a hammer) the spike through it into the wall; the needle in spike will not injure the hat or garment, neither will it show on wall or wood where it has been driven. The deception is perfect, as the spike appears to have been driven half-way through the hat or coat, which can be left hanging on the wall. Price, 10 cents, or 3 for 25 cents; by mail, postpaid.
C. BEHR, 150 W. 62d Street, N. Y.

LINK THE LINK PUZZLE.
The sensation of the day. Pronounced by all, the most baffling and scientific novelty out. Thousands have worked at it for hours without mastering it, still it can be done in two seconds by giving the links the proper twist, but unless you know how, the harder you twist them the tighter they grow. Price, 6c.; 3 for 15c.; one dozen, 50c., by mail, postpaid.
FRANK SMITH, 383 Lenox Ave., N. Y.

THE RUBBER DAGGER.
On account of the war we have substituted this novelty for the Magic Dagger. It is eight inches in length, made to look exactly like a steel weapon and would deceive almost anybody at whom you might thrust it. But as the blade is made of rubber, it can do no injury. Price 15c. by mail, postpaid.
H. F. LANG, 1815 Centre Street, Brooklyn, New York.

CHARLIE CHAPLIN'S CIGARETTE.
The simplest trick out. All you have to do is to get the cigarette into Charlie's mouth. Ah, ha! But can you do it? We doubt it. Anyhow, you might try. It's a safe bet your friends can't work it. The trick is a stationary head and a loose cigarette in a metal box all. Price 12c. by mail, postpaid. If you don't get one you'll regret it, that's with a glass top.
FRANK SMITH, 383 Lenox Ave., N. Y.

IMITATION GIANT DIAMONDS.

Diamond rings or studs of half-inch and one inch in diameter are heard of in stories only. We have them imitated by prodigious sparkling stones which will deceive the glance of any spectator. Price, by mail, postpaid, small size, 25c each; large size, 35c each.

H. F. LANG, 1815 Centre St., B'klyn, N. Y.

MONGOL PLAYING CARDS.

An exact imitation of a pack of the finest quality playing cards in a very neat case. You hand the package to your friend, requesting him to shuffle the cards, and as he attempts to do so a cap inside explodes loud enough to make him see stars. Price 25c, by mail, postpaid.

C. BEHR, 150 W. 62d St., New York City.

PHANTOM CARDS.

From five cards three are mentally selected by any one, placed under an ordinary handkerchief, performer withdraws two cards, the ones not selected; the performer invites any one to remove the other two, and to the great astonishment of all they have actually disappeared. No sleight-of-hand. Recommended as the most ingenious card trick ever invented. Price 10c, by mail.

C. BEHR, 150 W. 62d St., New York City.

WHITNEY BUS GAME.

A circular metal box with a glass top. Inside is a tiny garage fixed at one side and a loose traveling little Ford. It requires an expert to get the swiftly moving auto into the garage. This one grabs your interest, holds it, and almost makes you wild when you find after repeated trials how hard it is to do the trick. Price 12c, by mail, postpaid.

WOLFF Novelty Co., 168 W. 23d St., N. Y.

GREAT BURGLAR PUZZLE.

The latest and most fascinating puzzle ever placed on the market. Patented May 30. It consists of four revolving dials, each dial containing 16 figures, 64 figures in all. To open the safe these dials must be turned around until the figures in each of the 16 columns added together total 40. The puzzle is made on the plan of the combination lock on the large iron safes that open on a combination of figures. Persons have been known to sit up all night, so interested have they become trying to get each column to total 40, in this fascinating puzzle. With the printed key which we send with each puzzle the figures can be set in a few minutes so as to total 40 in each column.

Price 15 cents; mailed, postpaid.

H. F. LANG, 1815 Centre St., B'klyn, N. Y.

LUCKY PENNY POCKET PIECE.

This handsome pocket piece is made of aluminum, resembling somewhat in size and appearance a silver dollar. In the center of the pocket piece is a new one-cent U. S. coin, inserted in such a way that it cannot be removed. (U. S. laws prevent our showing this coin in our engraving). On one side of the pocket piece are the words, "Lucky penny pocket piece; I bring good luck," and the design of a horseshoe. On the opposite side, "I am your mascot," "Keep me and never go broke," and two sprigs of four-leafed clover. These handsome pocket pieces are believed by many to be harbingers of good luck.

Price 12 cents; 3 for 30 cents; by mail, postpaid.

H. F. LANG, 1815 Centre St., B'klyn, N. Y.

HALF MASKS.

False-faces beaten a mile! There are 7 in a set and represent an Indian, a Japanese girl, a clown, Foxy Grandpa, an English Johnny Atkins and an Automobillist. Beautifully lithographed in handsome colors on a durable quality of cardboard. They have eyeholes and string perforations. Price, 6c. each, or the full set of 7 for 25c., postpaid.

C. BEHR, 150 W. 62d St., New York City.

THE LUNG TESTER.

We have here one of the greatest little novelties ever produced. With this instrument you can absolutely test the strength of your lungs. It has an indicator which clearly shows you the number of pounds you can blow. Lots of fun testing your lungs. Get one and see what a good blower you are. Price 15c, by mail.

postpaid.

C. BEHR, 150 W. 62d St., New York City.

GOOD LUCK GUN FOB.

The real western article carried by the cowboys. It is made of fine leather, with a highly nicked buckle. The holster contains a metal gun, of the same pattern as those used by all the most famous scouts. Any boy wearing one of these fobs will attract attention. It will give him an air of western romance. The prettiest and most serviceable watch fob ever made. Send for one to-day. Price 20 cents each by mail postpaid.
